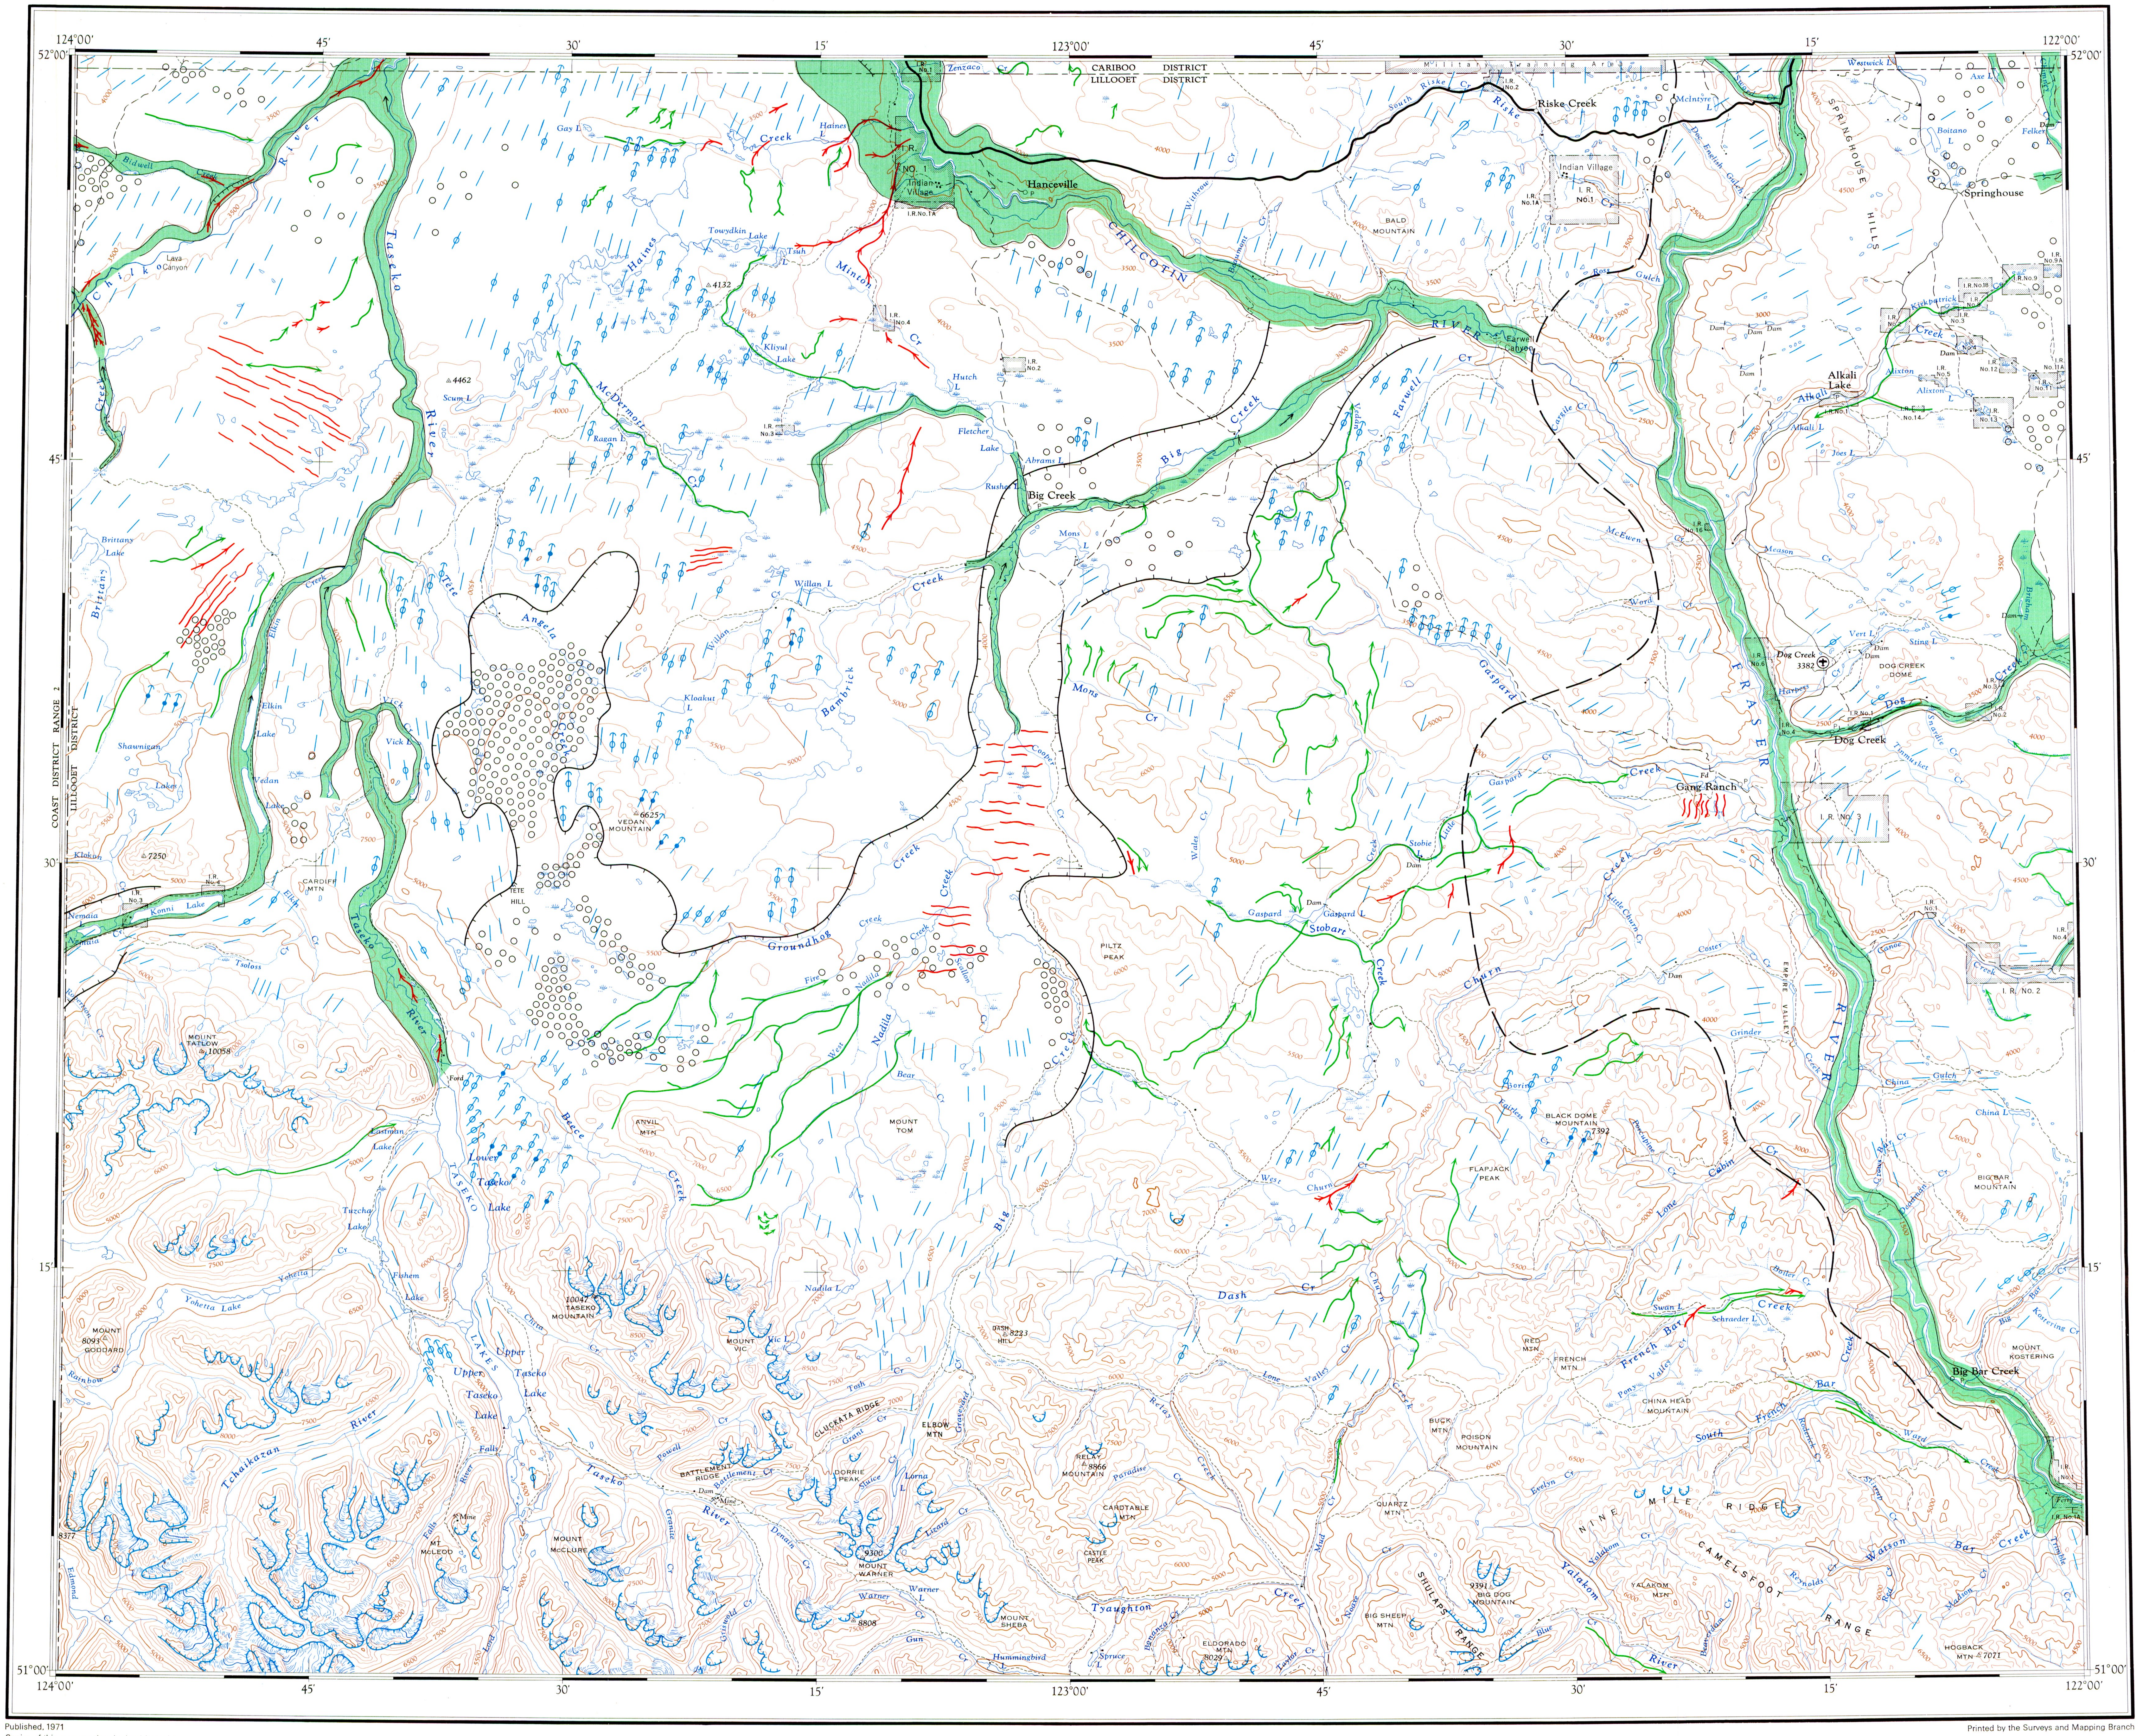
GEOLOGICAL SURVEY OF CANADA
DEPARTMENT OF ENERGY, MINES AND RESOURCES



LEGEND

Drumlin (direction of flow known, unknown)

Rock drumlin (direction known from crag and tail)

Glacial grooves

Glacial striae on bedrock

Large meltwater or outwash channels and river channels bounded by cutbanks and terraces (arrows indicate direction of flow)

Small meltwater or abandoned stream channels (direction of flow known, unknown)

Pitted terrane

Eskers and esker complexes

Cirques

Drift ridges of uncertain origin

Approximate limit of late advance of Cariboo Mountain ice

Approximate margins or limits of late advance of valley glaciers or ice lobes from Coast Mountains

Geology by H.W. Tipper, 1954-1969

To accompany GSC Bulletin 196 by H.W. Tipper

Geological cartography by the Geological Survey of Canada

Topographic base-map at the same scale published by the Surveys and Mapping Branch, 1955

Magnetic declination 1970, varies from 23°55′ easterly at centre of west edge to 23°36′ easterly at centre of east edge. Mean annual change decreasing 3.2′
