NRS Sheet # – 15188

LEGEND

Isopach, metres (defined, approx)
(Log intervals 0, 12.5, 25, 50, 100m)
Assumed velocity 1.5 km/s

Interval of sediments similar to unit 4 within unit 3
(distally grades into unit 3; limit defined by change in bedding style).

Mass flow of part or all of unit 3

Isobath, metres (Bathymetry from CHS charts 1235 and 1236)

Description: Very weakly stratified and highly conformable mud. Contains stratified intervals in south shore and is divided by a stratified interval like Unit 4 on the north shore. Appears more stratified down–estuary. Distal equivalent to unit 2. Features local ponding against unit 1 and some large post–depositional mass flows.

Interpretation: Ice–distal marine sediments
