

Plate XVI. View of the Parry Islands Fold Belt on north central Bathurst Island, looking east from May Inlet along the Half Moon Bay structure. In centre foreground is a local dome that developed in the Bathurst Island and older formations, and is overlain unconformably by the Stuart Bay Formation. Formation symbols are those of Map 000 A. Section 27 (composite) occurs on the dome, and Section 28 off the flanks; both are described (see Appendix).
