

Plate XIV and XV

Plate XIV The Eureka Sound Formation at the head of Freemans Cove, showing an interbedded olivine basalt flow. The sediments in the background are shown in closeup in Plate XV, and dip beneath the flow and overlying sediments shown in the foreground. An intrusive basalt plug stands above the surrounding terrain in the centre background

*Section 40*

Plate XV Lower part of the Eureka Sound Formation, showing white sand and black shale, and the plant bearing tan sandstone bed

*Section 40*
