

Fig. 19

62°30'

#### LEGEND

- EVEN Nos.** Intermediate to felsic volcanics, mainly pyroclastics, minor sediment
- ODD Nos.** Intermediate to mafic flows
- Dashed line** Exhalite zone; solid-known, dotted-inferred
- Dotted line** "Larder Lake" type carbonate exhalite
- Symbol with crosses** Intermediate to felsic domical batholith
- Dash-dot line** Geological contact; solid-established, dashed-approximate, dotted-hypothetical
- Symbol with arrows** Trace of anticlinal axial surface
- Symbol with arrows** Trace of synclinal axial surface
- Symbol with arrow and numbers** Cross section; ① North Heninga; ② Maguse; ③ Spi Lake; ④ Kaminak Lake
