MAC AND MINID

Original name
Elements or industrial minerals are listed in order of decreasing economic importance.
Commonly used terms which describe the general type of deposit.
MASS, M = massive sulphide
VEIN, V = vein
REPL, R = replacement (includes deposits which may be syngenetic)
SKRN, S = skarn
VEIN, V = vein

Describes the property in terms of its size, grade, and production as of May, 1975.
S = showing; dimension and grade are unknown and tasks are underfoot workings
P = prospect or developing prospect; an estimate of element is available but grade may not be known
P = producer or past producer; has produced 1 ton or more.
All properties lie in UTM Zone 11U. Northings and eastings are read from NTS 1:50,000 maps.

Certainty of location of property
1 = located to within a 1-km square but usually to within 100 m.
2 = located to within a range of 1-6 to 6-km square.
3 = located to within a range of 6 to 10-km square.

MacDonald and Mineral Deposit files respectively. Property identification numbers of two commonly used mineral deposit files.

Help in acquisition, formatting and computer handling of these data was given by: F. G. Giroux, and A. Sinclair of MINED, Department of Geological Sciences, University of British Columbia, and J. Jackson and J. Wray, British Columbia Department of Mines and Petroleum Resources. Please notify the author of any errors or omissions.
