A1	
Keweenaw and Huronian	
Geological boundary (Position defined or approximately known)	
Geological boundary (Position assumed)	

Note. The term Laramie is used with the implied meaning given to it in the Report of Progress for 1909-10, page 41, as a group term to include all the stratigraphically conformable formations from the top of the Peace River to the unconformity below the Oligocene.

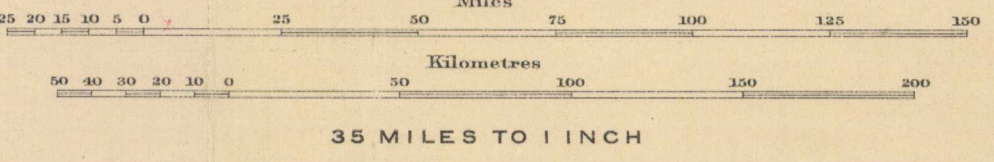

C.O. SENN, Geographer and Chief Draftsman
A.S. SMITH, Draftsman

MAP 55A
(Revised 1913)

These maps from improved plates of the Department of the Interior
Geology compiled from published and unpublished maps of the Geological Survey.
