

# RURAL MUNICIPALITY OF KELLROSS NO-247, SASKATCHEWAN

FIGURE 1

Map showing the surface and bedrock geology  
as it affects the supply of ground water, and  
areas in which the ground water occurs

FIGURE 2

Map showing the drainage and relief,  
and the location and types of wells  
with source of ground water supply

Area of knolls and depressions  
in glacial drift (moraine) in  
which variable supplies of  
water are obtained from pockets  
of sand and gravel at depths of  
4 to 286 feet

**NOTE:**

The Marine Shale series underlies  
the glacial drift throughout the  
municipality

Well class 1  
In drift In bedrock

Flowing wells (These are  
usually designated as  
Flowing Artesian wells)

Well class 2  
In drift In bedrock

Wells in which the water  
is under pressure but  
does not rise to the surface  
(These are usually designated  
as Non-flowing Artesian wells)

Well class 3  
In drift In bedrock

Wells in which the water  
does not rise above the  
water table (These are  
usually designated as Non-  
Artesian wells)

Dry holes  
In drift In bedrock

Contours (interval 50 feet)

Scale of miles
