Figure II-2. Map to show locations of chemically analysed samples.
Basic rocks are indicated by solid circles, acid rocks by open circles.

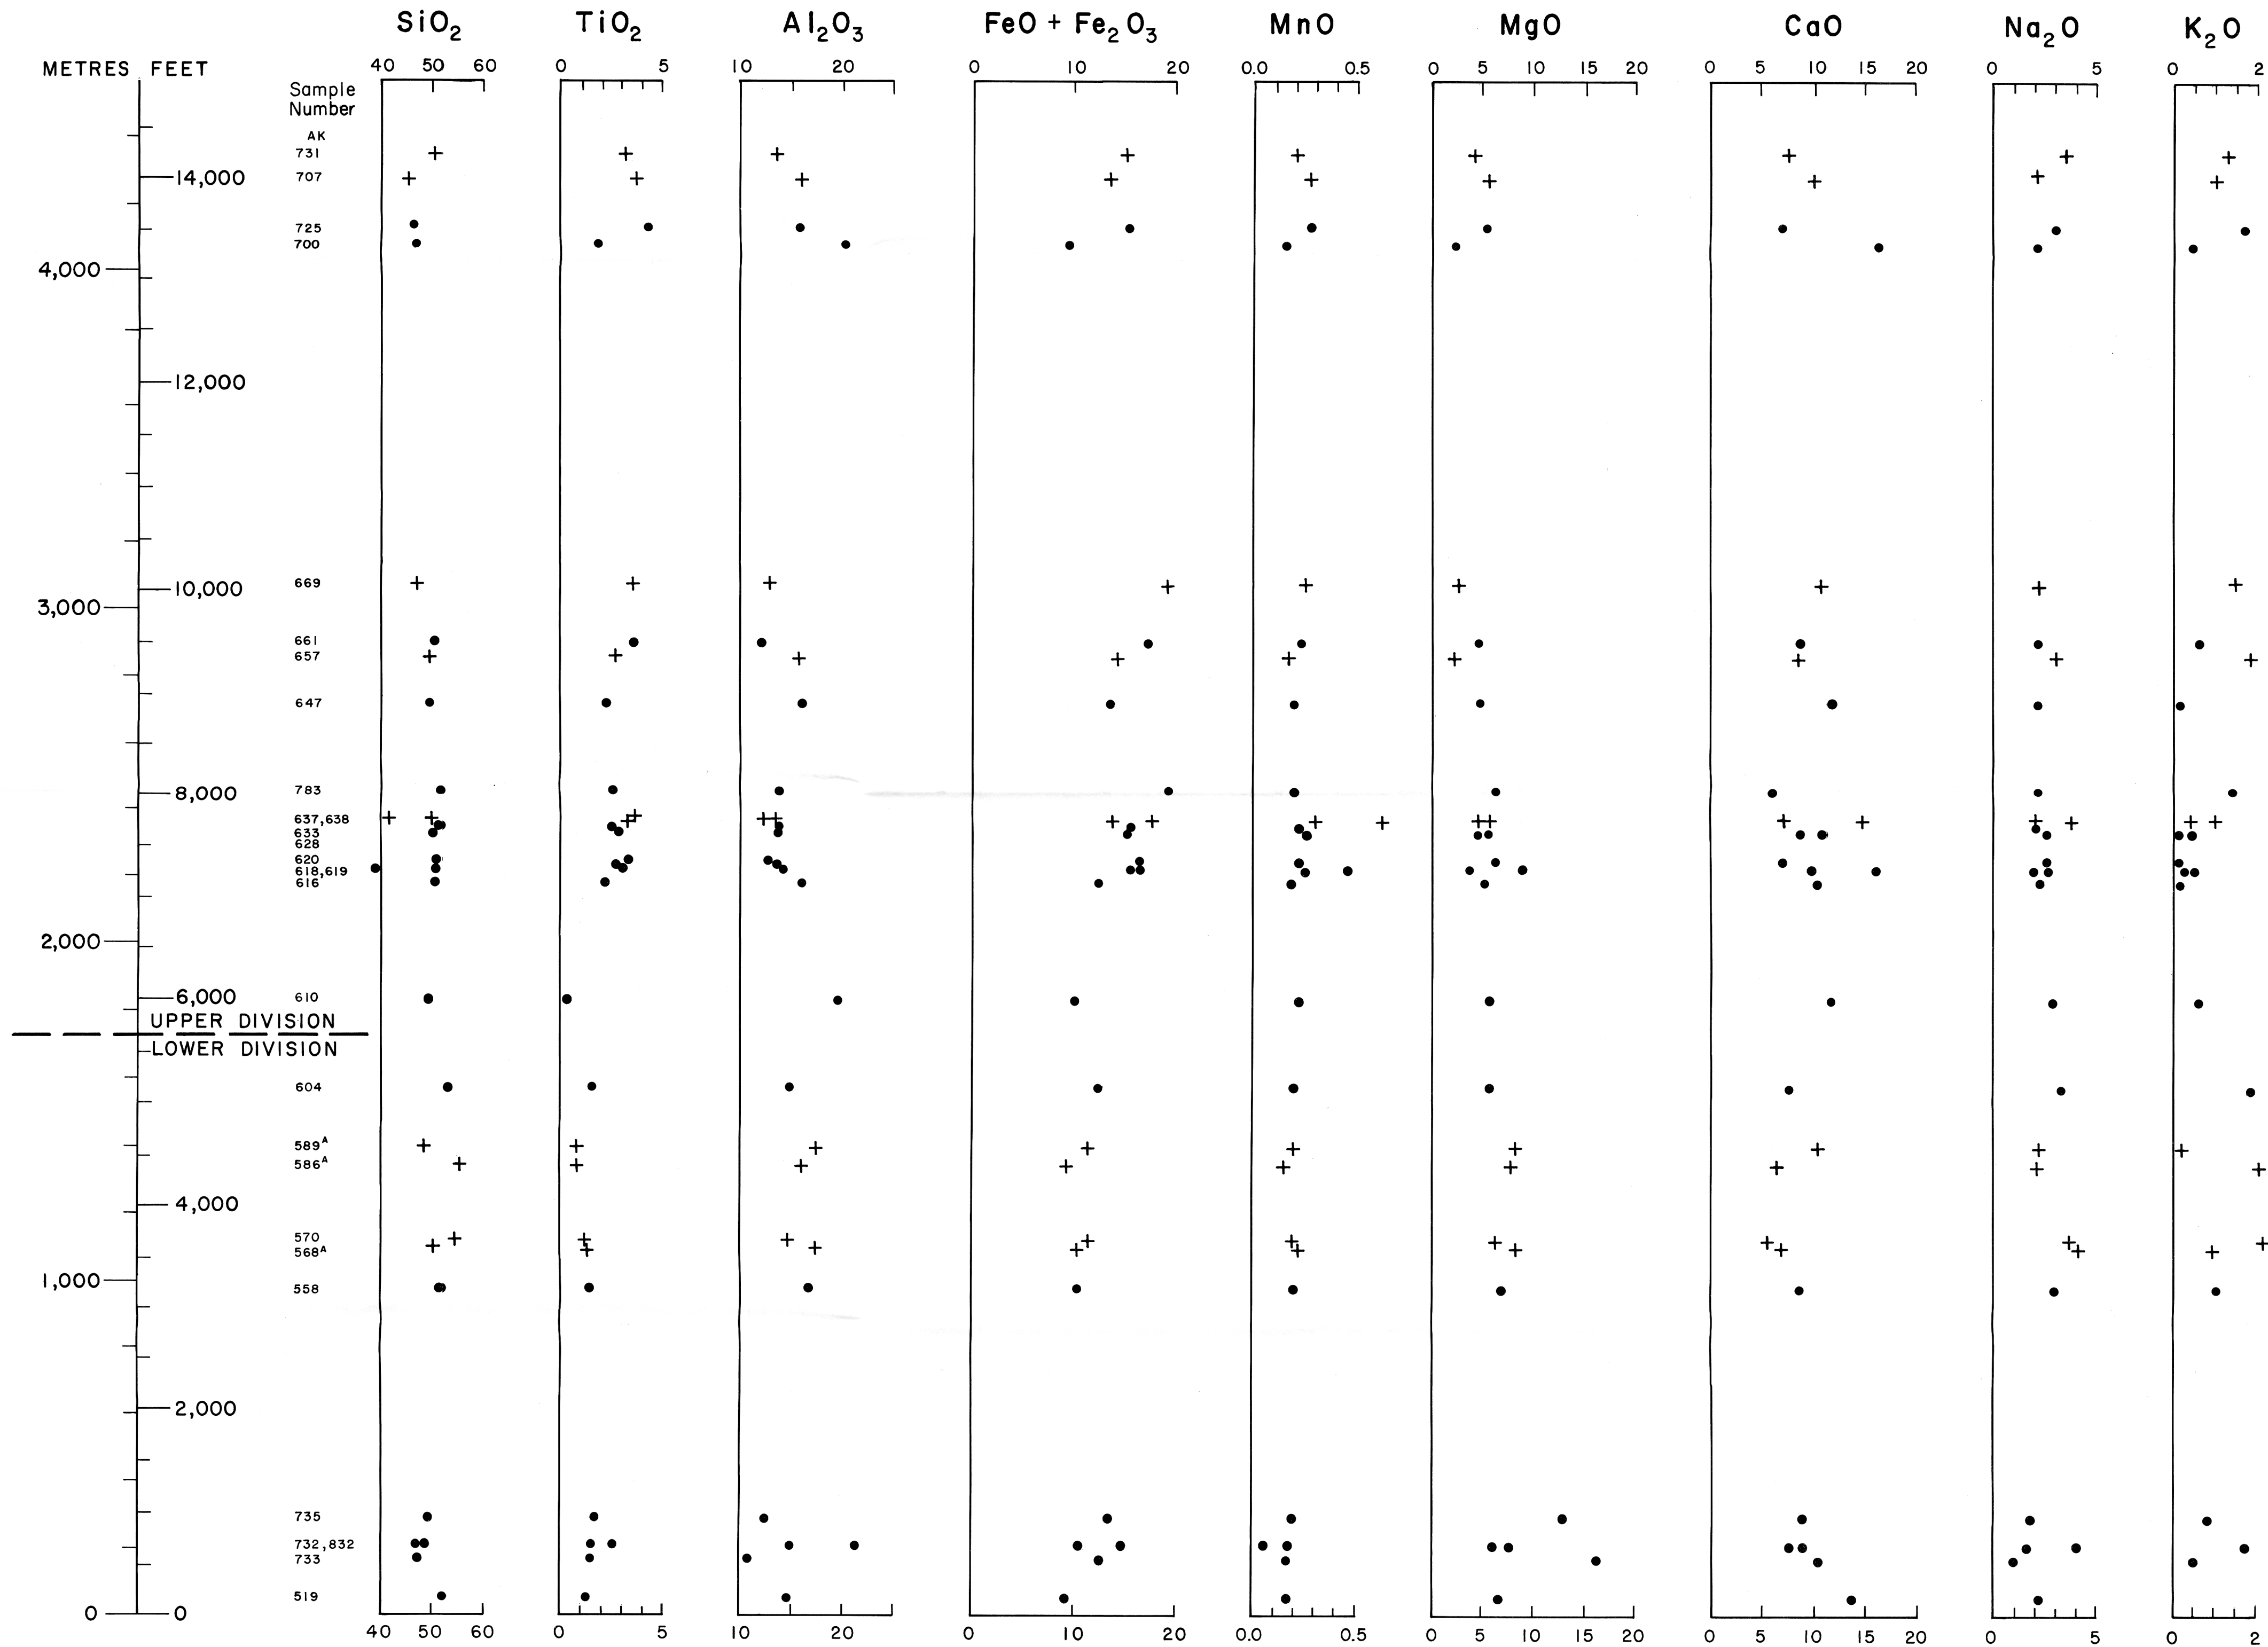

Figure II-1. Stratigraphic variation in major element chemistry of the Mamainse Point area Keweenaw basalts.
All oxide values plotted are taken from the recalculated analyses of Table 5, and are given in weight per cent.
Fine-grained basalts are indicated by small crosses, coarse-grained basalts by solid circles.
