PUBLICATIONS ON THE GEOLOGY OF THE ARCTIC ISLANDS  
BY THE GEOLOGICAL SURVEY OF CANADA

INTRODUCTION

Included in this list are all publications by officers of the Geological Survey of Canada that describe or illustrate the geology of the District of Franklin (Arctic Islands region). Most of these reports are available at distribution offices of the Geological Survey. Papers published in scientific journals other than those of the Geological Survey are not available, although abstracts of many of these are published occasionally in the Survey's Papers series. Geological Survey of Canada Papers superseded by Bulletins or Memoirs have been omitted.

Publications issued by the Geological Survey of Canada comprise maps and reports. Maps include basic geological maps and special maps such as those dealing with geophysical observations. The various types of geophysical maps are not listed here but indices are available for them. Reports concerning the Arctic Islands region are of several categories:

- Memoirs - - Comprehensive reports on the geology of specific areas.
- Bulletins - Detailed studies on any geological or related subject.
- Papers - - Designed for prompt publication of geological information.

Requests for geological maps and reports should be addressed to:

Geological Survey of Canada,  
601 Booth Street,  
Ottawa 4, Canada.

or

Institute of Sedimentary and Petroleum Geology,
