**PUBLICATIONS BY THE GEOLOGICAL SURVEY OF CANADA ON THE
GEOLOGY OF THE INTERIOR PLAINS OF CANADA NORTH OF 60° LATITUDE**

INTRODUCTION

Included in this list are all publications of the Geological Survey of Canada to January, 1974 that describe or illustrate the geology of the Interior Plains of Canada north of 60° Latitude, including the Beaufort Sea. Pertinent maps and reports that overlap the Plains boundaries have been included. In cases where the material has been superseded by later reports, there is some duplication. All of the reports and maps listed, except for those indicated as being out of print, are available at the distribution offices of the Geological Survey.

Publications issued by the Geological Survey of Canada comprise maps and reports. Maps include basic geological maps, and special maps such as those dealing with geophysical observations. The various types of geophysical maps are not listed here but indices are available for them.

Requests for geological maps and reports should be addressed to:

Geological Survey of Canada

Ottawa, Ontario, Canada K1A 0E8

or:

Institute of Sedimentary and
Petroleum Geology

Calgary, Alberta, Canada T2L 2A7

Canol Project Reports also have been included in this list although they were not compiled by the Geological Survey. The geological work on this project was carried out by Imperial Oil Limited under agreement with the Government of Canada and was concerned with the exploration and drilling for oil in the Fort Norman and adjoining areas of the Northwest Territories and Yukon (see Paper 45-16 for further details on the project). The Canol Project Reports were submitted to the Government of Canada and were never published; however, some of the results of the Canol Project were summarized by Hume and Link (1945) in GSC Paper 45-16, and by Hume (1954) in GSC Memoir 273. Copies of the Canol Project Reports are available for viewing at the libraries of the Geological Survey in Ottawa and Calgary.

REPORTS

ANNUAL REPORTS

The Annual Report Series was initiated in 1885 to replace the Reports of Progress (none of which is pertinent to this publication) and was discontinued in 1907 with the publication of Volume XVI for 1904. Most reports contained in this series have been issued as separates. Summary Reports are included as Part A or AA of each volume.

SUMMARY REPORTS

Summary Reports were first issued separately as Part A or AA of the Annual Reports until the latter were discontinued with Volume XVI for 1904, published in 1907. With the Summary Reports for 1905, published in 1906, these became a separate publication series and continued as such until they were discontinued in 1933.

SEPARATE REPORTS

Most of the Geological Survey of Canada publications are part of a particular series, such as Memoirs, Bulletins, etc., and are designated by the series number. Some reports lack a series number and bear only a publication number, and these are grouped under Separate Reports. Between the discontinuance of the Annual Reports in 1907 and the commencement of the Memoirs in 1910, the Separate Reports were the only publications sent to press.
