To R. W. BROCK, Esq.,  
Director Geological Survey,  
Department of Mines.

SIR,—I beg to submit the following memoir on the Triangulation  
of Vancouver island, B.C., made during the year 1909.

I have the honour to be, sir,  
Your obedient servant,

R. H. CHAPMAN.

Ottawa, April 2, 1910.

TRIANGULATION AND SPIRIT LEVELING  
OF  
VANCOUVER ISLAND, BRITISH COLUMBIA  
1909

BY

R. H. Chapman

TRIANGULATION.

Triangulation was extended from the vicinity of Victoria, about eighty miles up the island, to points northward and southward from Cowichan lake.

Preliminary observations were made to Mt. Arrowsmith, and several stations were located near Nanaimo for the control of a large scale topographic map of that vicinity.

The observations were made with a Bausch and Lomb Optical Co. theodolite with 8 inch circle, reading by micrometer microscopes to two seconds. Signals were built on all primary, and several secondary stations before observations were made. The centre of each station is marked in a permanent manner, and several witness marks were usually placed on each station.

Observations for azimuth were made on Gonzales Hill station near Victoria, by sights to Polaris.

The latitude, longitude, and distances, depend upon values furnished by the United States Coast and Geodetic Survey for two points near Victoria. These values are for stations on Discovery island and Gonzales hill, and are reduced to the "U. S. Standard": which is a mean value of many astronomical stations widely distributed over North America, and tied together by triangulation.

All observations of the primary stations have been adjusted by the least square method,

The work was done under my direction by Mr. S. C. McLean, with Mr. T. B. Williams as assistant.

The data contained in the following statement, are arranged under three heads:—

**Primary Stations**—Points upon which signals were erected, permanent marks left, and observations made. (Symbol ▲.)

**Secondary Stations**—Points upon which signals were erected, permanent marks left, but no observations made. They are computed from more than one unclosed triangle. (Symbol △.)

**Intersected Points**—Objects not signalled but cut in from primary stations, and computed from one or more unclosed triangles. (Church spires, lighthouses, etc.) (Symbol ⊙.)

#### Saltspring (Admiral) island.

About five miles northwest of the town of Sidney, on the southwestern slope of Mt. Tuam on the southern end of Saltspring island. The station is about 100 feet below, and about 300 yards southwest of the highest point of Mt. Tuam.

**Centre**— $\frac{3}{4}$  inch drill hole,  $1\frac{1}{2}$  inch deep, surrounded by a triangle, in solid rock.

**Witness No. 1.**—A copper nail and burr, marked G. S. C., in root of blazed fir tree, 3 feet diameter, 36 feet north of centre.

**Witness No. 2.**—Ditto, in top of stump of balsam fir 15 inches diameter 87·4 feet northwest of centre.

Latitude, 48° 43' 35"·25. Longitude, 123° 29' 06"·75.

## Albert.

U.S.C. and G.S. 1869.

G.S.C. 1909.

About six miles southwest of Victoria, on the open grassy slope, with low rocky ledges, of Albert head. It is about 80 feet above the sea, south of a row of trees that reach nearly to the water, and nearly half a mile south of the northernmost point of the head.

*Centre.*— $\frac{5}{8}$  inch drill hole, 2 inches deep, in solid rock—Eley, London, No. 12 gauge paper shell in hole, established 1869 by U.S.C. and G. S.

*Witness.*—Copper nail and burr, marked G.S.C., on root of a blazed fir tree 86·8 feet about southwest of centre.

*Note.\**—Cannot see southwest, west, or northwest from here.

Latitude,  $48^{\circ} 23' 16'' \cdot 649$ . Longitude,  $123^{\circ} 28' 38'' \cdot 916$ .

## Arrowsmith.

(Not occupied.)

About thirty miles a little north of west of Nanaimo, on the highest point of Mt. Arrowsmith. A high, sharp, serrated and bare rocky ridge,

*Centre.*—None.

Latitude  $49^{\circ} 13' 27'' \cdot 4$ . Longitude,  $124^{\circ} 35' 37'' \cdot 4$ .

## Benson.

G.S.C. 1909.

About five miles west of Nanaimo on the highest point of the southern of the three rocky knolls of Mt. Benson.

*Centre.*—A  $\frac{5}{8}$  inch drill hole,  $1\frac{1}{2}$  inch deep, surrounded by a triangle, in solid rock, on the east side of highest point. An Eley, London, No. 12 paper shell in hole. The rock splintered while drilling.

*Witness No. 1.*—A wire nail and brass burr, marked G.S.C.  $\Delta$ , in top of a blazed dead stump 33.2 feet west of, and 10 to 12 feet lower than centre.

*Witness No. 2.*—Brass nail and burr, stamped G.S.C.  $\Delta$ , in top of blazed stump 59.1 feet northwest of, and 8 to 10 feet below centre.

*Witness No. 3.*—Ditto, in notch in root of blazed dead fir 60.5 feet on slope north of, and 20 feet below centre.

*Witness No. 4.*—Arrow on flat sloping rock 10 feet northwest of, and 4 feet below centre.

Latitude,  $49^{\circ} 09' 00'' .56$ . Longitude,  $124^{\circ} 02' 58'' .48$ .

## Brenton.

G.S.C. 1909.

About fifteen miles northwest of Duncan, on the highest rocky point of a conical timbered mountain of the high, heavily-timbered ridge of Mt. Brenton. This rocky point is about two miles southwest of the

part of the ridge described as Brenton Bluff, and is entirely hidden by the timber for short distances over about 100 feet of it. About two miles north of west of station is a higher timbered ridge with two summits, one of which has a rocky cliff.

*Centre.*—A  $\frac{5}{8}$  inch drill hole,  $\frac{3}{4}$  inch deep, surrounded by triangle, in solid rock, Eley, London Gas Tight, 12 gauge paper shell loose in hole.

Lines cleared to Prevost, Admiral, Jocelyn, and DeCourcy.

*Witness No. 1.*—Copper nail and burr, stamped G.S.C.  $\Delta$ , at foot of blazed hemlock stub, almost dead, 16.6 feet a little east of north of centre.

No. 2.—Ditto, at foot of blazed hemlock 6 inches diameter, 19.8 feet a little north of east of centre.

No. 3.—Ditto, in top of hemlock stump 3 inches diameter, 34.2 feet southeast of centre.

Latitude,  $48^{\circ} 54' 05'' \cdot 946$ . Longitude,  $123^{\circ} 50' 47'' \cdot 734$ .

### Brenton (Bluff).

G.S.C. 1909.

(Not occupied.)

About ten miles north from Duncan, on the rocky bluff at the north-east end of the ridge of Mt. Brenton,  $2\frac{1}{2}$  miles—and visible from the Tyee mine on Mt. Sicker.

No permanent mark.

Latitude,  $48^{\circ} 54' 35'' \cdot 6$ . Longitude,  $123^{\circ} 48' 41'' \cdot 2$ .

To Station.	Azimuth.			Back Azimuth.			Log. Distance.

Prevost .....	337	34	11	157	36	22	3·96822

## Buffalo.

G.S.C. 1909.

*(Not occupied).*

About twelve miles southwest of Nanaimo, on the summit of a mountain about 4,100 feet high, called (limited local use) Buffalo Hump. This mountain lies almost due south of Benson. It is fairly well timbered about the base, and up to an elevation of 3,000 feet, where the timber passes into rock and scrub. The top is formed of a series of bare rocky knolls. The station is on the highest point of the knoll, east of the highest summit, and 8 to 10 feet lower.

*Centre.*—A triangular  $\frac{5}{8}$  inch drill hole,  $1\frac{1}{2}$  inch deep, surrounded by a triangle, in solid rock—No. 12 gauge Dominion Sovereign paper shell in hole.

*Witness No. 1.*—Brass nail and burr, marked G.S.C., in a notch in the root of a blazed stunted pine 18·4 feet west of centre.

*Witness No. 2.*—Ditto, in top of a blazed, stunted, and contorted pine 20·6 feet north of, and 10 feet lower than centre.

*Witness No. 3.*—Ditto, in the end of a branch knot close to the root of blazed stunted pine 18·4 feet east of centre.

*Witness No. 4.*—An arrow, on rock 8·4 feet east of, and about 3 feet lower than centre.

Latitude, 49° 00' 30"·2. Longitude, 124° 04' 10"·5.

To Station.	Azimuth.			Back Azimuth.			Log. Distance.
	°	'	"	°	'	"	Metres.

DeCourcy .....	246	06	55	66	21	28	4·40887

## Conspicuous.

G.S.C. 1909.

About seventeen miles a little north of west of Victoria, on the high, bare, rocky, conical peak which is visible from there. It is the highest point in this part of the island (about 2,200 feet), stands up conspicuously, and cannot be mistaken. The station is on the highest knoll of the southeast part of the rim of the saucer-like top, on a knob of rock about 3 feet south, and 1 foot lower than the highest knob.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, surrounded by triangle, in solid rock—a plug of wood loosely in the hole.

*Witness No. 1.*—Copper nail and burr, marked G.S.C.  $\Delta$ , in the top of a blazed stump of a pine tree, 20.5 feet west of centre.

*Witness No. 2.*—Ditto, in top of a blazed pine stump, 19.8 feet northwest of centre.

*Witness No. 3.*—Ditto, in top of a blazed pine stump, 21.5 feet east of centre.

*Witness No. 4.*—Arrow chiselled on a knob of rock 16.2 feet south-east of centre.

Latitude,  $48^{\circ} 27' 57'' \cdot 20$ . Longitude,  $123^{\circ} 40' 21'' \cdot 52$ .

\* Calculated from Geodetic positions.

## Cottle.

G.S.C. 1909.

About four miles northwest of Nanaimo and about one mile west of Departure bay, on Cottle hill—a bare rocky knoll about 400 feet high, and three-quarters of a mile east of prominent rock top.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, surrounded by a triangle, in solid rock. A No. 12 gauge paper shell (Kynoch, Birmingham) loose in hole.

*Witness No. 1.*—Brass nail and burr, stamped G.S.C.  $\Delta$ , in notch at root of a blazed pine tree, 70.4 feet southeast of centre. A companion pine, and the stump of a third, stand within 3 feet or so, of this one.

*Witness No. 2.*—Arrow on a rocky knob, 21.0 feet west of centre.

*Witness No. 3.*—Brass nail, etc., in notch, in root of blazed fir 78.3 feet northwest of, and 15 feet lower than centre.

Latitude,  $49^{\circ} 13' 14'' \cdot 48$ . Longitude  $123^{\circ} 59' 31'' \cdot 50$ .

\* Calculated from Geodetic positions.

### DeCourcy.

G.S.C. 1909.

About twelve miles, a little southeast of Nanaimo, on the northern and largest of the DeCourcy group of islands off the east coast of Vancouver island. The station is on a little camel-back of rock close to the edge of the bluff, on the western shore, and at about the highest point. It is about one-quarter mile south of the residence of Wm. Fluid, owner of the island. Back of, and around the station, is a grove of fir and arbutus trees, entirely clear of underbrush.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, surrounded by triangle, in solid rock, and with paper cartridge shell.

*Witness No. 1.*—Brass nail and burr, in notch in root of blazed arbutus, 33.9 feet north of centre.

*Witness No. 2.*—Brass nail and burr, in notch in root of blazed arbutus, 20 feet northeast of station.

*Witness No. 3.*—Ditto, in notch in root of blazed fir, 25·4 feet south-east of station.

*Witness No. 4.*—Arrow on same camel-back of rock as, and 9·1 feet southeast of centre.

Latitude, 49° 06' 04"·59. Longitude 123° 44' 54"·84.

\* U.S.C. and G.S. position and azimuth.

**Douglas.**

U.S.C. and G.S. 1854.

G.S.C. 1909.

About five miles north of Post-office, Victoria, on a flat spot on the highest point of Mt. Douglas (locally Cedar hill); about 35 feet north of an old shallow prospect hole.

*Centre.*—A 1 inch drill hole, 2 inches deep, in solid rock.

*Witness No. 1.*—Arrow cut in large boulder, 23·5 feet southeast of station.

*Witness No. 2.*—Copper nail and burr, marked G.S.C., in notch on south side of gnarled, stunted fir, 34·5 feet north-northwest of centre.

Latitude, 48° 29' 36"·76. Longitude, 123° 20' 45"·02.

## Gonzales.

U.S.C. and G.S. 1867-8.

G.S.C. 1909.

About 1.8 miles east of Parliament buildings at Victoria—on the summit of Gonzales or Shotbolts hill, close to wireless mast of Radio Telegraph of the Department of Marine and Fisheries.

*Centre.*—Brass wood screw in plug, surrounded by a mound of cement about 4 inches high.

*Witness No. 1.*—A  $\frac{5}{8}$  inch drill hole in highest point of rock on summit, 14.8 feet north, and 6.2 feet above centre.

*Witness No. 2.*—Wireless mast in concrete base, about 132.6 feet north of centre.

*Witness No. 3.*—Copper nail and washer, marked G.S.C., on root of blazed fir (pine) tree, 31.1 feet south of, and 10 feet below station.

Latitude, 48° 24' 50" .28.\* Longitude, 123° 19' 27" .78.

\* Position, azimuth, and Dist., from U.S.C. and G.S. data of Jan. 26, 1910.

\*\* Observed Oct. 13-15, 1909.

## James.

About  $4\frac{1}{2}$  miles southeast of the town of Sidney on the southwestern end of James island: an island off the east coast of Vancouver island, owned by I. H. Wheatcroft. The station is about 200 feet northeast of three large fir trees, and about 50 to 75 feet above sea-level.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, and surrounded by a triangle, in a granite boulder of about 200 pounds weight, level with surface.

3333—2

*Witness No. 1.*—Copper nail and burr, marked G.S.C., in root of a blazed arbutus tree, 54 feet north-northeast of centre.

*Witness No. 2.*—Ditto, in root of a blazed fir, about 202·5 feet southwest of centre.

*Witness No. 3.*—Ditto, in root of a blazed fir, 181 feet southwest of centre.

Latitude, 48° 35' 24"·85. Longitude, 123° 20' 47"·96.

### Jocelyn.

G.S.C. 1909.

About twelve miles northwest of Victoria, on the summit of Mt. Jocelyn. This mountain is east of and in the angle of bend of Finlayson arm of Saanich inlet. The station is on the south end of the summit, on a ridge of rock running about north and south, and about 10 feet below the highest point.

*Centre.*—A 3 inch brass screw in a plug of wood surrounded by conical mound of cement, about 3 inches high.

*Witness No. 1.*—Arrow in surface rock, about 19·1 feet southwest of centre.

*Witness No. 2.*—A copper nail and burr, marked G.S.C., in the root of a blazed fir (dead), about 111 feet southeast of centre.

*Witness No. 3.*—Ditto, in root of a blazed jackpine, 65 feet east of station.

*Witness No. 4.*—Ditto, in root of a blazed fir, 115 feet northeast of station.

Latitude, 48° 32' 09"·64. Longitude, 123° 31' 35"·37.

**Koksilah.**

G.S.C. 1909.

About five miles west of Cowichan station on the Esquimalt and Nanaimo railway, on the summit of the bare, rocky, eastern end of Koksilah ridge, at elevation about 2,500 feet. The west end and summit of the ridge are heavily wooded, but the eastern end is rocky and bare, and the eastern slope well burnt over. The station is on the north corner of the highest knob of rock, about three feet north of, and one foot lower than the highest point. Ten feet north is another knob of almost equal height.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, in solid rock, surrounded by triangle.

*Witness No. 1.*—Arrow on a high knob of rock 8.8 feet north of centre.

*Witness No. 2.*—Brass nail and burr, marked G.S.C.  $\Delta$ , in a notch in the root of a blazed and trimmed pine 36 feet east of station.

*Witness No. 3.*—Ditto, in notch in root of a tall, half dead fir, with branches on the east side only, 60.8 feet southeast of station.

*Witness No. 4.*—Arrow on highest point of same rock as station, and 3.1 feet south of centre.

*Witness No. 5.*—Arrow on a flat surface of rock, 16.6 feet west of centre.

Latitude,  $48^{\circ} 42' 01'' \cdot 30$ . Longitude,  $123^{\circ} 45' 05'' \cdot 12$ .

### McDonald.

(Not occupied.)

G.S.C. 1909.

About two miles southwest of Goldstream station on the Esquimalt and Nanaimo railway, on a flat rocky knoll on the highest point of the mountain, just west of a grove of large fir trees. Southwest of the station, on a lower knoll, is an old triangulation station, (a pole set in a pile of rocks) probably of Admiralty Survey.

*Centre.*—A  $\frac{5}{8}$  inch drill hole, 2 inches deep, in solid rock.

*Witness.*—A copper nail and burr, marked G.S.C., in a branch stub of a large blazed fir tree, trimmed to the top, 19 feet southeast of centre.

Latitude, 48° 26' 32"·0. Longitude, 123° 34' 04"·6.

**Whymper.**

G.S.C. 1909.

About eight miles nearly north of the mouth of Cottonwood creek, Cowichan lake, on the highest point of Mt. Whymper (name from B. A. chart) a sharp, rocky peak, north of the Chemainus river. It is the easternmost and highest (about 5,100 feet) of the ragged peaks near the head of the Chemainus.

*Centre.*—A  $\frac{5}{8}$  inch drill hole,  $1\frac{1}{2}$  inches deep, in solid rock, over which is built a cairn of rock 5 feet diameter, by 6 feet high.

*Witness No. 1.*—+, on solid rock 16·8 feet northeast of centre.

*Witness No. 2.*—A 30/30 brass shell in top of small stump, 6·9 feet southwest of centre.

*Witness No. 3.*—+, cut in solid rock, 14·1 feet south of centre.

Latitude,  $48^{\circ} 57' 06'' \cdot 23$ . Longitude,  $124^{\circ} 09' 40'' \cdot 71$ .

## SPIRIT LEVELING.

During the field season of 1909 levels were run in the vicinity of the city of Victoria, up the Saanich peninsula as far as Sidney, and from Ladysmith to Welington *via* Nanaimo.

A 14 inch Dumpy level was used, with a New York rod. Back-sights and foresights were of equal length, or compensated by balancing, and each line was run at least twice. Steel pins were firmly driven in the ground, and used as turning points. All readings of the rod were made and recorded by instrumentman and by rodman in separate notebooks.

Where possible, brass nails with round heads, driven through brass washers stamped 'G.S.C., B.M.,' were used as bench-marks.

## Victoria and Vicinity.

The datum for the Victoria and Saanich work is mean sea-level, which was obtained as described below.

The reference is the bench mark at Victoria of the Tidal Survey, described as follows:—

\*“At the rear of the old Custom House building on Wharf street at the foot of Broughton street. The top of a brass bolt drilled vertically into the granite rock, at 16 feet (SW) from the northwest corner of the building, with letters B.M. cut beside it on the sloping surface of the rock.”

This bench mark was given an elevation of 9·12 feet above mean sea-level. It was derived as follows:—

	feet.
<sup>1</sup> Tidal Survey B.M., above city datum.....	105·80
Mean sea-level above city datum observations 1895-1897 (2 years).....	96·75
Mean sea-level above city datum observations 1903-1904 (1 year).....	96·54
Weighted mean of 3 years observations, above city datum.....	96·68
Tidal Survey B.M., above mean sea-level.....	9·12

<sup>1</sup> \*38th Annual Report of Department of Marine and Fisheries. Supplement No. I. pp. 8 and 11.

In addition to the elevation of the bench marks described, many heights of indefinite points, such as intersections of streets, railway crossings, etc., are given to the nearest foot.

The work was done under my supervision by Mr. Oscar Barrette.

### Victoria and Vicinity.

\* 38th Annual Report, Dept. Marine and Fisheries, Supplement No. 1, p. 10.

### Nanaimo, Wellington, and Ladysmith.

The elevations in this vicinity depend on an approximate determination of mean sea-level by the Tidal Survey, deduced from tide observations during six weeks in 1899: from March 26, to May 12, obtained by Captain M. H. Smyth, R.N., of H.M.S. *Egeria*.\*

The value obtained is the half tide level between the average elevation of high water and average low water, above the Admiralty datum, during one lunar month in the above period.

	feet.
Admiralty low water, datum . . . . .	0·00
B. M. on foreshore . . . . .	10·25
Mean sea-level . . . . .	10·50
Summit beacon, Beacon Rock . . . . .	18·60
B. M. Custom House . . . . .	51·80

The above figures give the following heights, using mean sea-level as a datum.

Summit of beacon, Beacon Rock . . . . .	8·10
Foreshore B. M. . . . .	0·25
Custom House B. M. . . . .	41·30

The shore B.M. value is used as initial height in the tabulated statement which follows:—

### Nanaimo and Vicinity.

From Nanaimo to Wellington, *via* Esquimalt and Nanaimo Railway track.

Nanaimo—Tidal Survey B. M. : a brass bolt cemented in rock within range of tide, and 38 feet 9 inches northward along shore from point of intersection of the line of northwest end of Custom House building with the line of half tide . . . . .	0·25
Nanaimo—Custom House : broad arrow cut on southeast side of door in rear wall : facing sea, and 1·4 foot above door sill . . . . .	41·341
Nanaimo—corner Fitzwilliam street and Selby avenue : cross on step of Occidental Hotel . . . . .	117·725
Nanaimo station—1·2 mile north of : cross on cement culvert, 7 feet east of track . . . . .	158·446
Crossing of Church avenue and Commercial street : centre of . . . . .	52
Crossing of Bastion avenue and Commercial street : centre of . . . . .	46
Crossing of Bastion avenue and Fitzwilliam street : centre of . . . . .	70
Crossing of Robson avenue and Fitzwilliam street : centre of . . . . .	105
Crossing of Esquimalt and Nanaimo Railway track, and Fitzwilliam street : centre of . . . . .	126
