

**BIG BEND AREA**  
COLUMBIA RIVER  
BRITISH COLUMBIA

Scale: 253,470 or 1 Inch to 4 Miles

SOURCES OF INFORMATION  
Geology by H. C. Gunning, 1928

**LEGEND**

- MESOZOIC**
- 4A: Porphyritic granite
  - 4B: granite
  - 4C: porphyritic granodiorite
  - 4D: quartz diorite
- MESOZOIC AND PRECAMBRIAN**
- 3: Granite-gneiss, sedimentary gneiss, quartzite, schist; all cut by granite and pegmatite
- PRECAMBRIAN**
- 2: Crystalline limestone, argillite, quartzite, and schistose derivatives
  - 1A: quartzite, greenstone, minor amounts of argillaceous and calcareous sediments
  - 1B: mica schist, quartzite, greenstone, minor amounts of argillaceous schists and crystalline limestone

- Geological boundary
- Mine adit
- Road and trail
- B. M. 1896'

**INDEX TO MINING PROPERTIES**

- Snowflake Group
- Woolsey Group
- Lanark (Wonderful) and Crystal adjoin
- Donald (Woolsey Mines, Ltd.)
- Waverley Group
- Tangler Group
- Mastodon
- J. and L. Group
- A. and E. Group
- Rosberry
- Standard Group
- Keystone Group
- Carbonate Chief
- Montgomery Group
- Placer Gold
- Placer Gold
- Ole Bull Group
- Silver Shield Group
- George Group

To accompany report by H. C. Gunning, in Summary Report, Part A, 1928.
