

Canada
Department of Mines

HON. SIR JAMES A. LOUGHEED, MINISTER; CHARLES CAMSELL, ACTING DEPUTY MINISTER

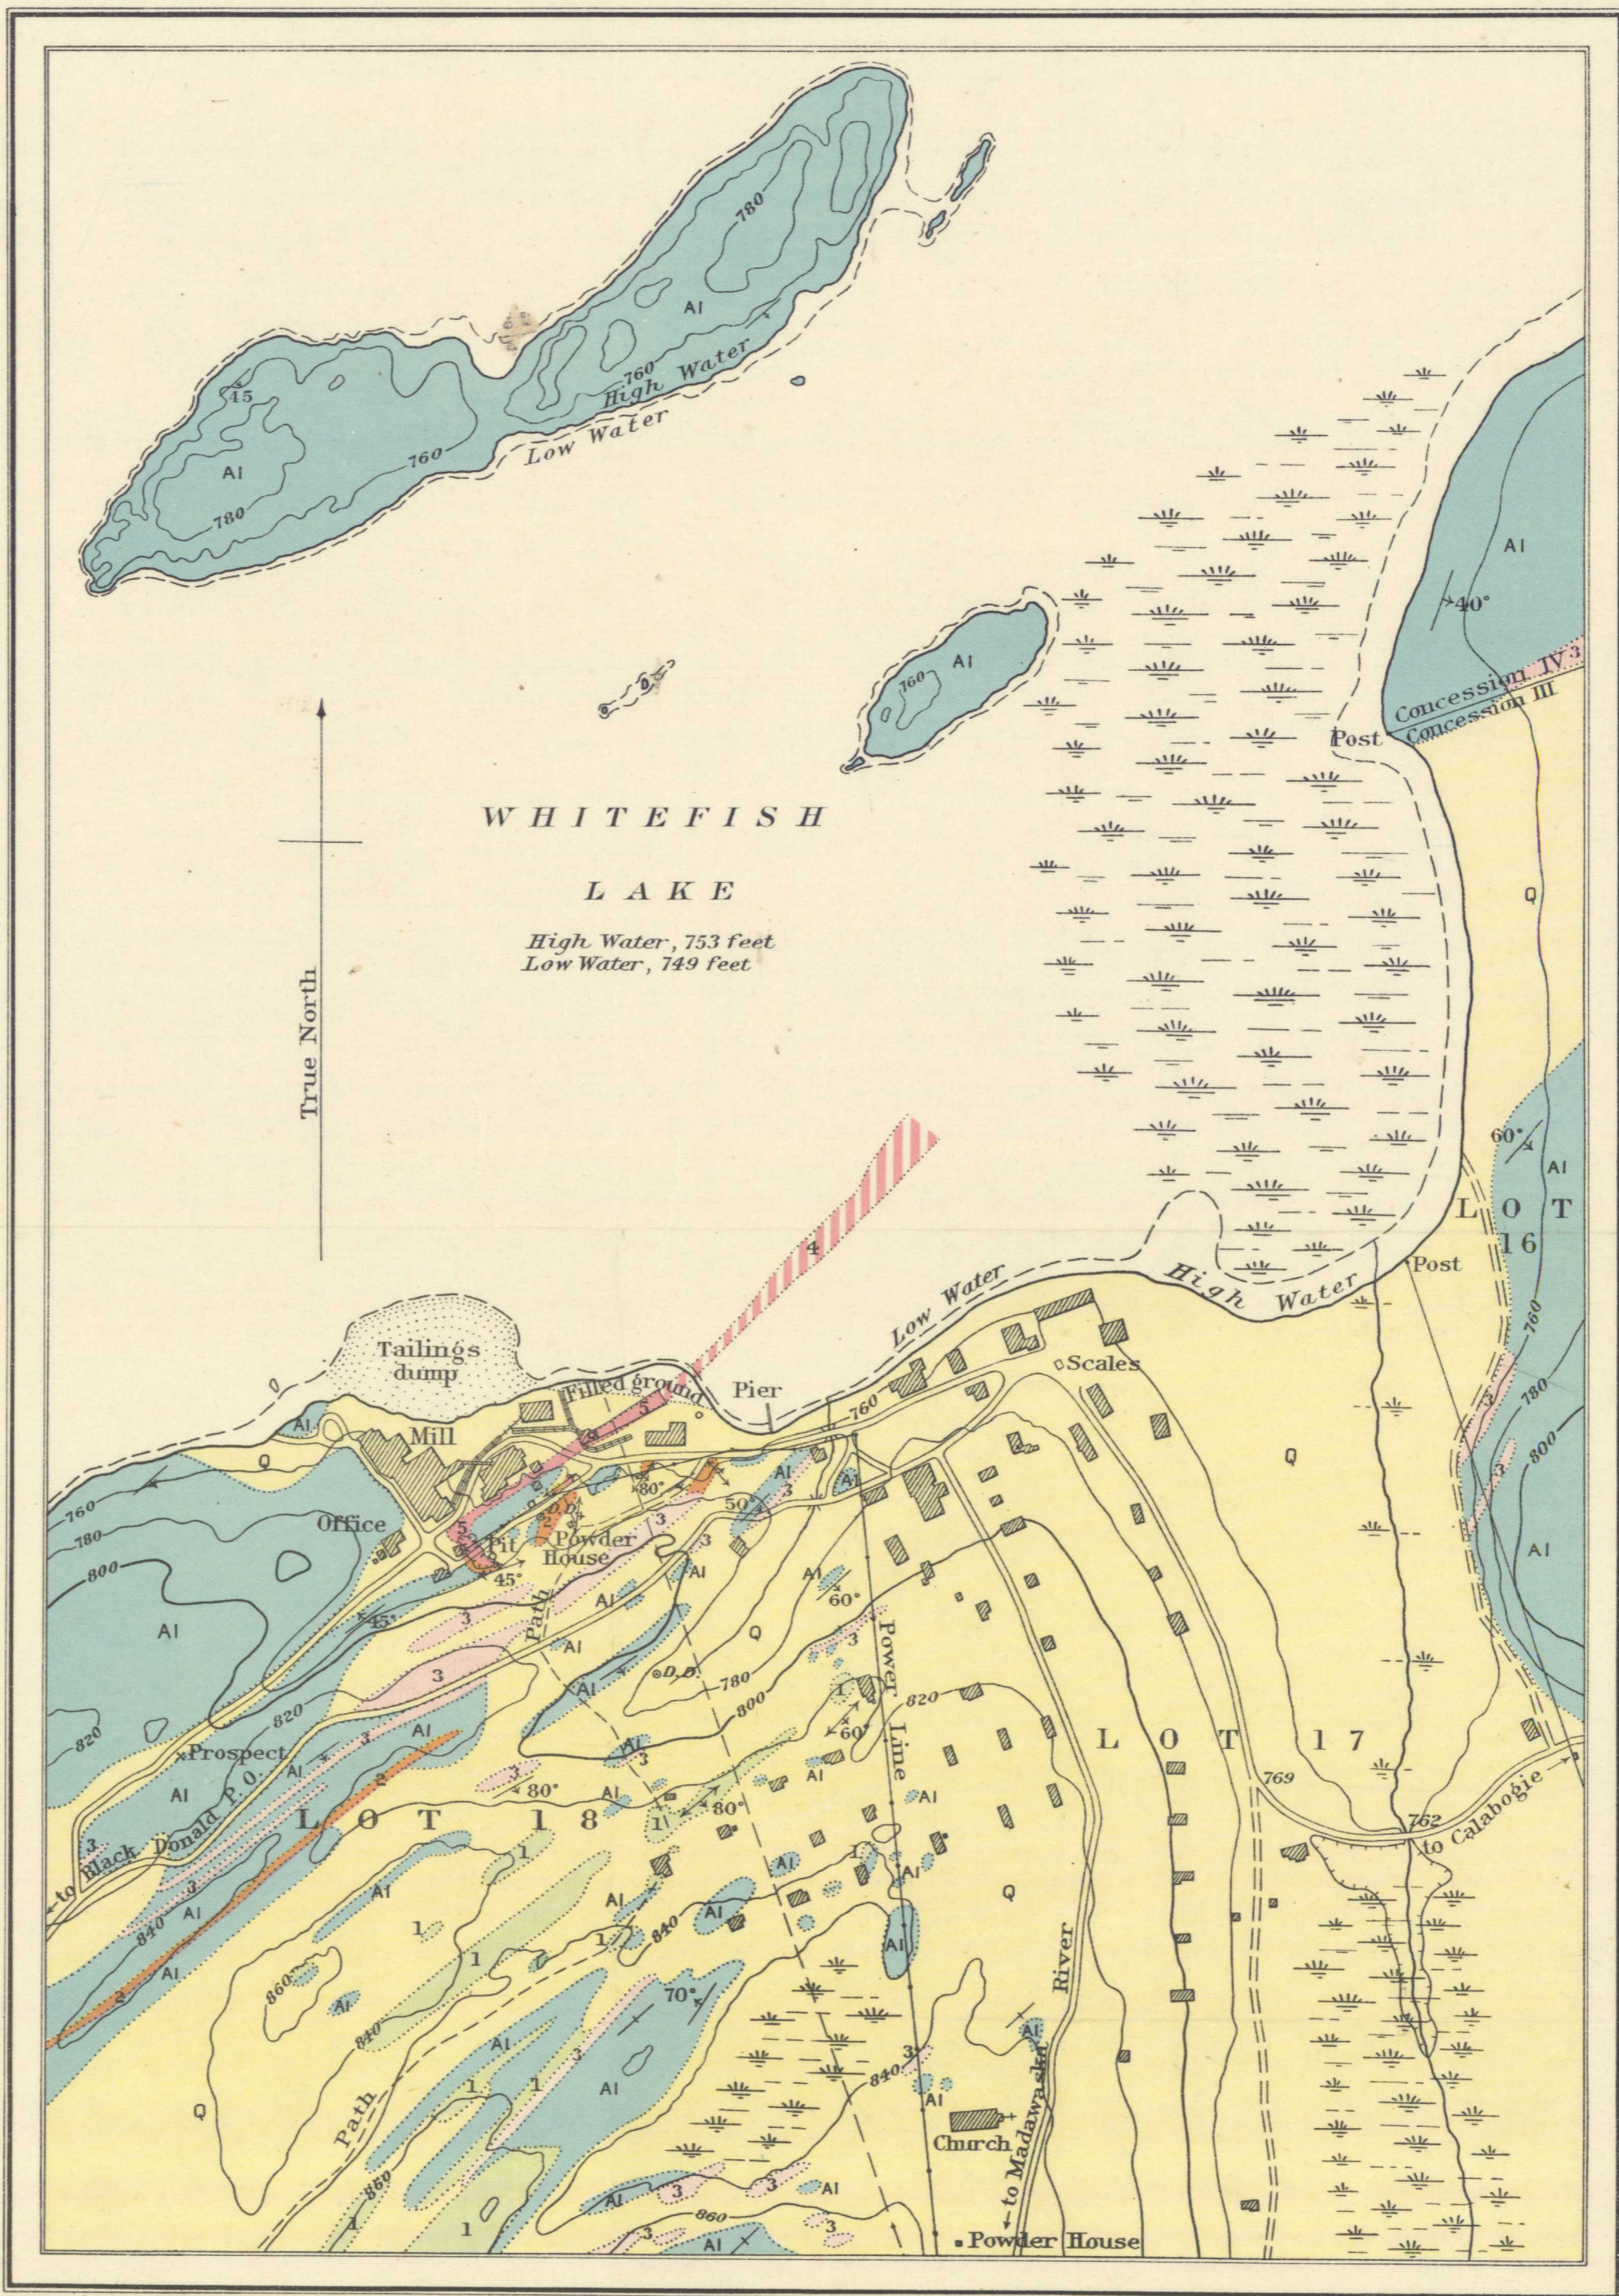

GEOLOGICAL SURVEY

WILLIAM McINNES, DIRECTOR.

Issued 1920

LEGEND

- QUATERNARY
- GLACIAL
- Q
Boulders, gravel, and boulder clay
 - 5
Outcrop of graphite ore body
 - 4
Continuation of ore body in mine workings beneath lake
 - 3
Pegmatite and apatite
 - 2
Rusty graphitic sericite schist
 - 1
Hornblende schist
- EARLY PRECAMBRIAN
- GRENVILLE SERIES
- A1
Crystalline limestone
- Symbols
- Geological boundary
 - 60°
Dip and strike
 - Vertical strata
 - 80°
Dip and strike, foliation
 - Vertical foliation
 - Roads and buildings
 - Roads (not well defined)
 - Mine and elevated tramways
 - Shafts
 - o.d.d.
Diamond-drill holes
 - Contours (showing land forms and elevations above sea-level)
 - Depression contours
- Approximate magnetic declination, 10° 20' West

C.O. Senécal, Geographer and Chief Draughtsman.
A.M. Gregor, Draughtsman.

Publication No 1799

GRAPHITE DEPOSIT, LOTS 17 AND 18, CONCESSION III, BROUGHAM TOWNSHIP,
RENFREW COUNTY, ONTARIO.

Scale of Feet
100 0 100 200 300 400 500

To accompany Summary Report, Part E, 1919,
and Memoir by M.E. Wilson.
