 - Building Stone
 - Clays
 - Silica
 - Petroleum
- 1.N.W. Numbers of quarter-sheet maps of regular series
 174 Catalogue numbers of Geological sheets
 317 Catalogue numbers of Surface Geology sheets

NOTE

The areas coloured Carboniferous along the bay of Fundy and in the valley of Kenebecasis bay and river are in large part of "Perry" or Upper Devonian age. These formations have recently been separated in the field. The areas of Carleton and Victoria counties are also Upper Devonian in part.
