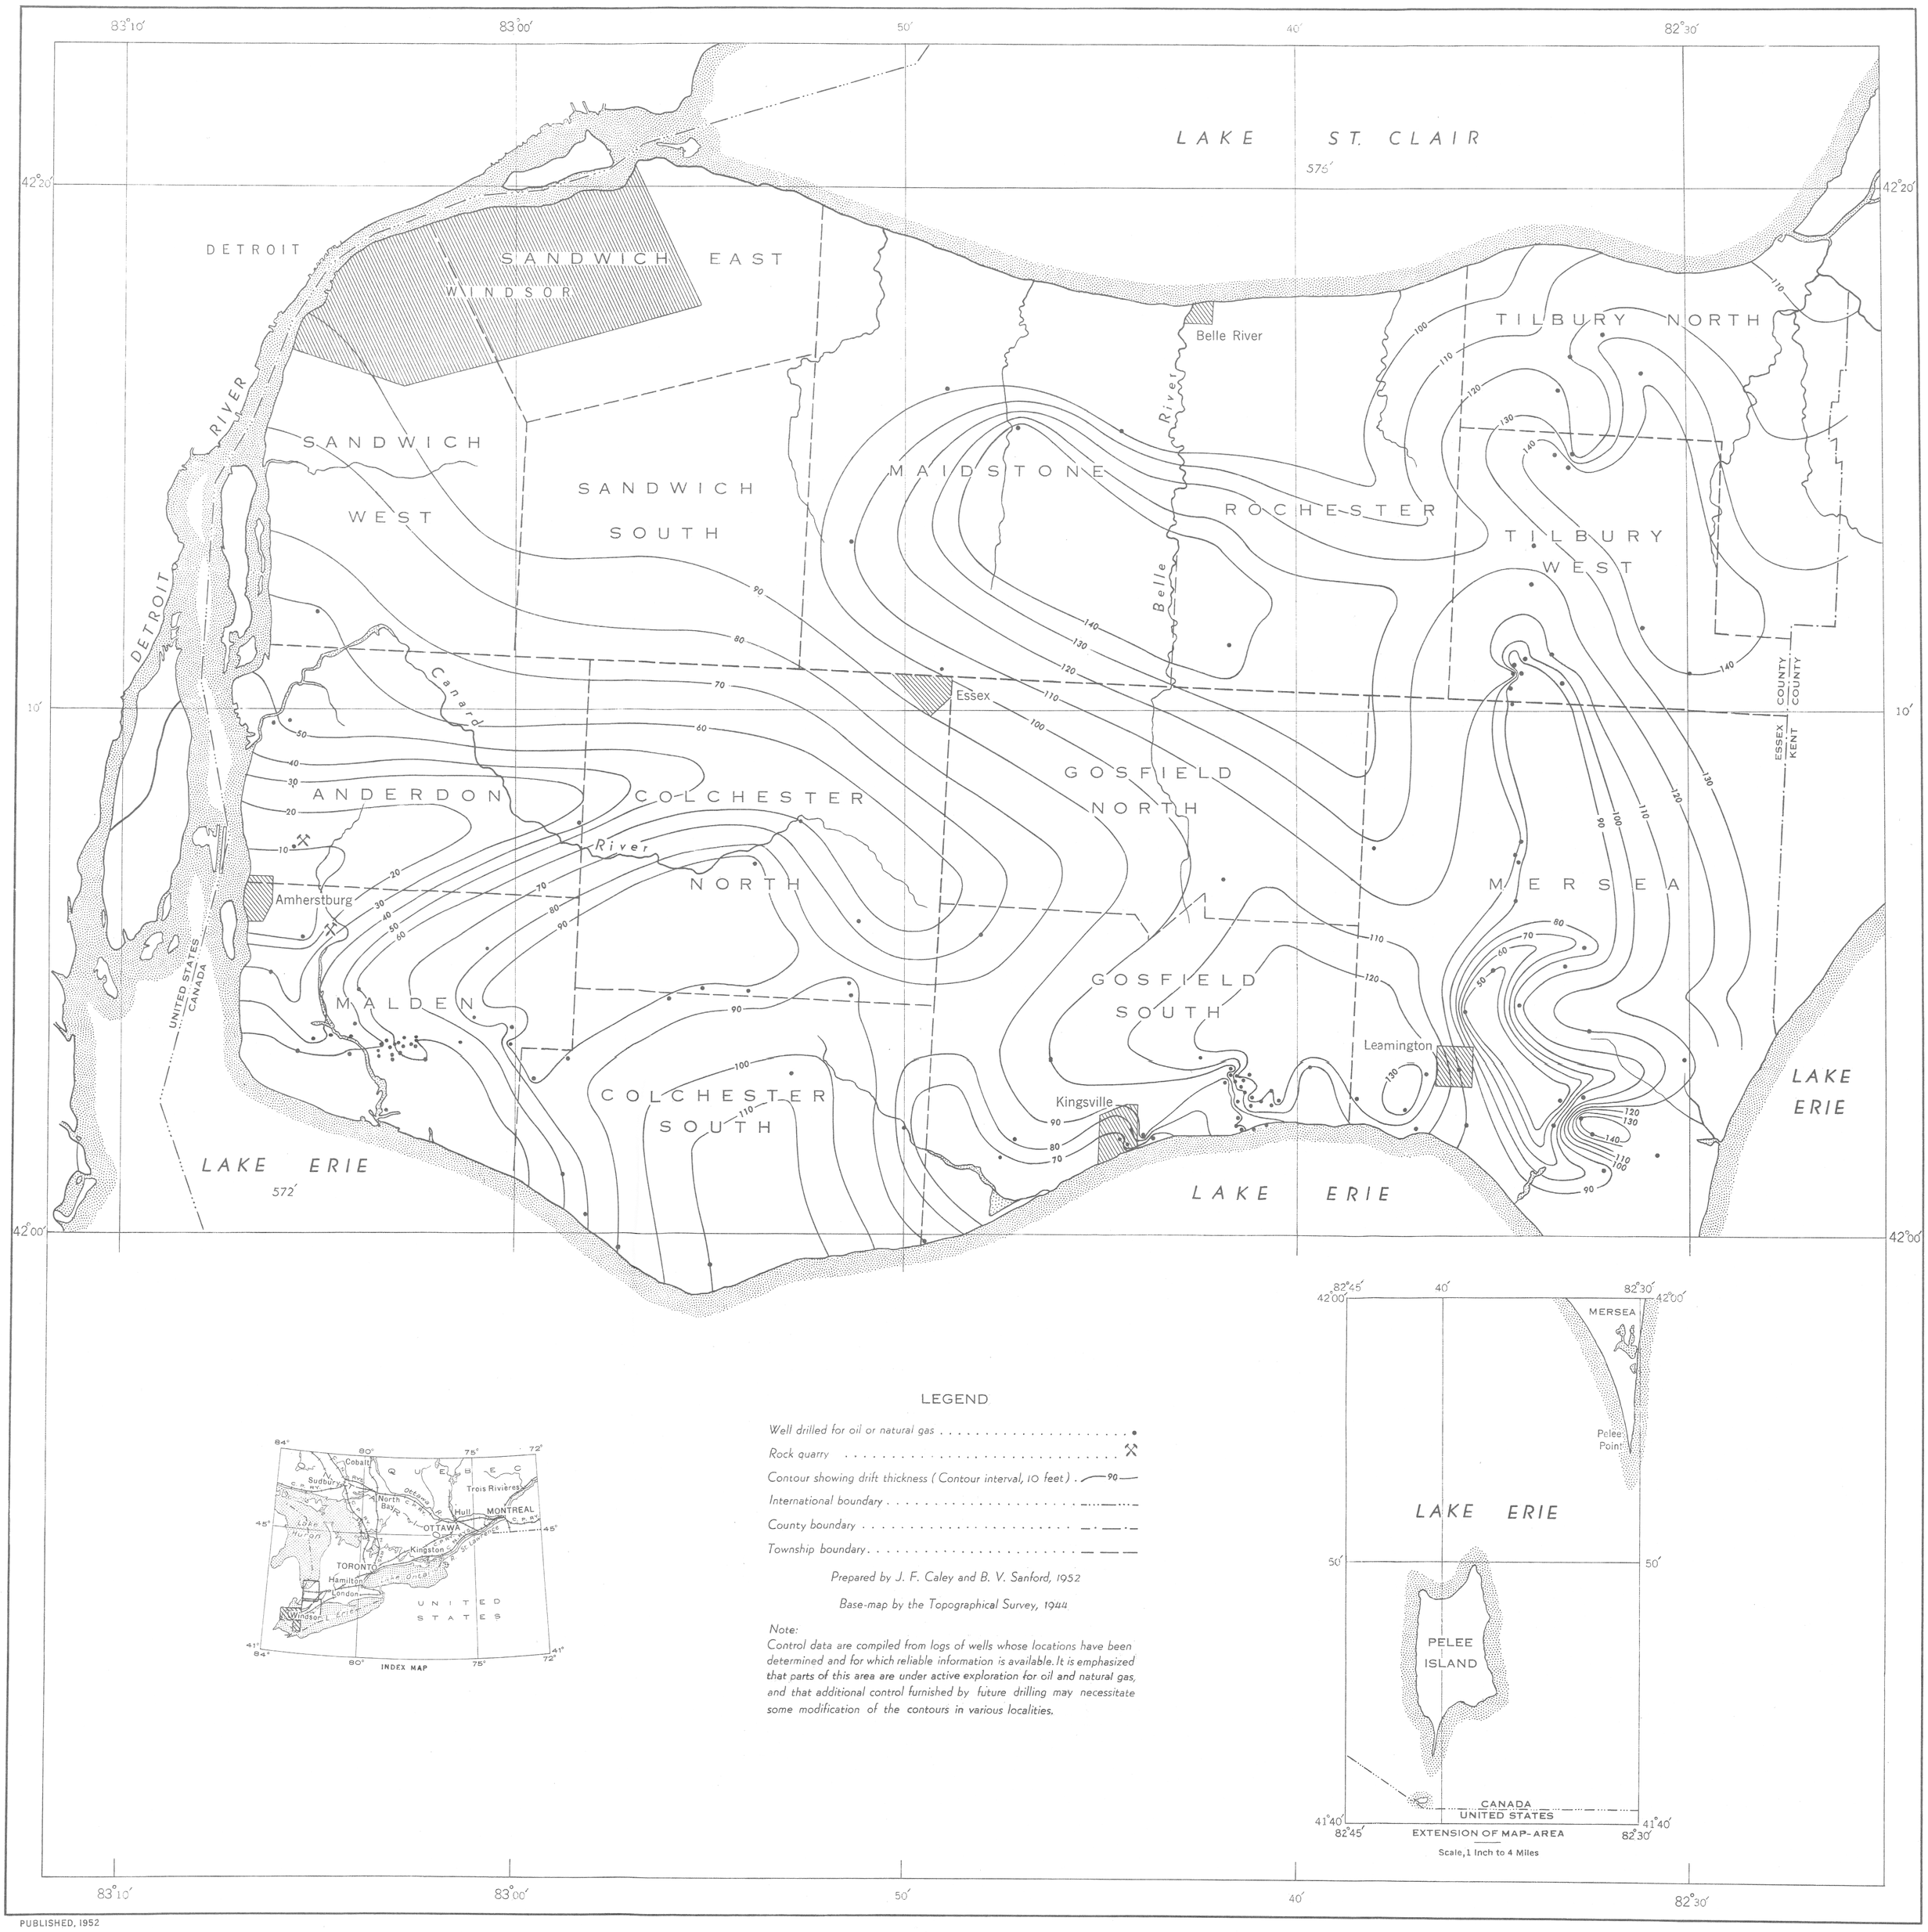
GEOLOGICAL SURVEY OF CANADA



LEGEND

- *Well drilled for oil or natural gas* . . . . . •
- *Rock quarry* . . . . . ⚒
- *Contour showing drift thickness (Contour interval, 10 feet)* . . . 90
- *International boundary* . . . .—....
- *County boundary* . . . . . — · — · —
- *Township boundary* . . . . . — — —

Prepared by J. F. Caley and B. V. Sanford, 1952

Base-map by the Topographical Survey, 1944

Note:
Control data are compiled from logs of wells whose locations have been determined and for which reliable information is available. It is emphasized that parts of this area are under active exploration for oil and natural gas, and that additional control furnished by future drilling may necessitate some modification of the contours in various localities.

PUBLISHED, 1952

PRELIMINARY MAP 52-17A

DRIFT-THICKNESS CONTOURS

ESSEX COUNTY
ONTARIO

Scale: One Inch to Two Miles = $\frac{1}{126,720}$
