

NOTE. The magnetic information shown on this map was supplied through the courtesy of the individual property owners. The compilers are extremely grateful for the co-operation shown by the various companies and individuals concerned, and by the Associate Committee on Geophysics of the National Research Council, who provided funds for this work. An attempt has been made to reduce all surveys to a common magnetic base, but individual surveys have not otherwise been changed.

This area has been geologically mapped on the same scale, and the magnetic compilation may, therefore, be studied in relation to the geology. The related geological publication for this area is Map 42-12, Sheets 1 & 2, Paper 42-12, Geological Survey of Canada.
