

LEGEND

POST-MISSISSIPPIAN

16, Kaministiquia granite: porphyritic granite
16A, feldspar porphyry and quartz-feldspar porphyry; in part related to 16, in part may be related to 14
BOUNDARY INTRUSIONS: gabbro, diorite, quartz diorite, hornblende, olivine gabbro, syenite

Granite, granodiorite, quartz diorite

Diorite, gabbro

MISSISSIPPIAN

Greywacke, arkose

Greywacke and arkose, with pebble beds

Conglomerate

Cliff Lake granite porphyry ("quartz-eye" granite); 9a, sheared granite

Meta-diorite, meta-gabbro

ARCHAEOGENEOUS

AMISK GROUP

Quartz porphyry, quartz porphyry breccia; 7a, derived sericite-carbonate schist

Rhyolite

Bedded tuff and breccia, in part with abundant interbeds of andesite

Porphyritic andesite breccia

Andesite breccia

Porphyritic andesite

Chiefly andesite, basalt, dacite, and flow breccia

MINERAL OCCURRENCES

Copper Cu

Zinc Zn

Gold Au

Arsenic As

Pyrrhotite Pr

Tungsten W

Geology by C. H. Stockwell, 1943, 1944, 1945.
