

**RETREAT OF WISCONSINA AND RECENT ICE
IN NORTH AMERICA**

Speculative ice-marginal positions during recession of last ice-sheet complex

- LEGEND**
- Present ice cover
 - Ice margin: age in thousands of radiocarbon years B.P. Note: ice-marginal lines are presumed to be isochronous; number of lines varies from place to place according to geomorphological evidence.
 - Major ice surge

Ice-marginal positions by V.K. Pratt, 1969
Ice-marginal shading by Survey and Mapping Branch
Cartography by Geological Survey of Canada

Scale 1:5,000,000
Miles 0 100 200
Kilometres 0 100 200
