GEOLOGICAL SURVEY OF CANADA
DEPARTMENT OF MINES AND TECHNICAL SURVEYS AEROMAGNETIC SERIES SHEET 85 A 5.0′ 40' 55′ 113°30′ 20' Joins Map 741 G,"Lake of the Grave" 114°00′ 55 40' 113°30′ PUBLISHED, 1959 MAP 746 G ADVANCE EDITION Airborne Magnetic Survey, July to September 1950, by Geophysics Division Geological Survey of Canada, Department of Mines and Technical Surveys. The magnetic data on this map were compiled from information recorded ISOMAGNETIC LINES (total field) along the flight lines shown. The anomalies expressed by the magnetic contours are dependent on the variable magnetic intensities of the underlying rocks, and HIGGINS LAKE 500 gammas. may be due to conditions near, or at unknown depths below, the surface. High 100 gammas.... No correction has been made for regional variation; magnetic anomalies normally indicate the presence of basic rocks, such as diabase, 20 gammas... this increases at the rate of 2.5 gammas per mile from DISTRICT OF MACKENZIE gabbro, or serpentine, which have a relatively high iron content; but in special west to east and 4.0 gammas per mile from north instances may be due, or partly due, to concentrations of magnetic ore minerals. NORTHWEST TERRITORIES Magnetic depression.... to south. By means of the magnetic anomalies, various rock bodies or structural features, such as faults or folds, may be traced by the geologist into, or across, areas The planimetry for these maps has been traced Flight line ..... Scale: One Inch to One Mile =  $\frac{1}{63,360}$ of few or no outcrops. In many instances, however, no interpretation of particular Flight áltitude: 1,000 feet above ground level from maps based on trimetrogon photography with anomalies may be possible without further geological information limited ground control. Lack of planimetric control may have led to large position errors in places. GEOPHYSICS PAPER 746 Air photographs covering this map-area may be obtained HIGGINS LAKE through the National Air Photographic Library, Topographical NORTHWEST TERRITORIES Surveys, Ottawa, Ontario.
