ÉCHELLE 1:50,000 SCALE

LIGNES ISOMAGNÉTIQUES (valeur absolue du champ total)  
ISOMAGNETIC LINES (absolute total field)

- 500 gammes
- 100 gammes
- 20 gammes
- 10 gammes
- Dépression magnétique
- Magnetic depression
- Lignes de vol
- Flight lines
- Altitude du vol: 300 mètres au-dessus du niveau du sol
- Flight altitude: 300 metres above ground level

ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN ENVOYANT UNE DEMANDE DE COPIE AU MINISTÈRE DES RICHESSES NATURELLES, À QUÉBEC, À LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA, CORPORELLA, OU À LA BRANCHE DES PUBLICATIONS DIVISION OF THE QUEBEC DEPARTMENT OF NATURAL RESOURCES, À OTTAWA, OU FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

PUBLIÉE EN 1977 PUBLISHED 1977

This map was compiled from originally recorded aeronomagnetic survey data obtained by a proton precession magnetometer which measured the total field with a resolution of 1 gamma. The trace of the lines of flight was established from 35 mm track film onto aerial photographs, transferred to a topographical map, reduced to a coordinate system, and then digitized.

After editing the survey data the coordinates of the intersections of traverses and control lines and differences in their magnetic values were printed out for use in the computer analysis.

The total field values were generated on a 0.3219 cm square grid at the published map scale using Geotrex Limited computer programs; the final aeronomagnetic map was contoured using the computer and digital plotting facilities of Phototrac Inc.

The data used in compiling this map are held in digital form by the Quebec Department of Natural Resources and the Canadian Department of Energy, Mines and Resources, for the cost of retrieval and copying. The analog records are available from the Quebec Department of Natural Resources only.

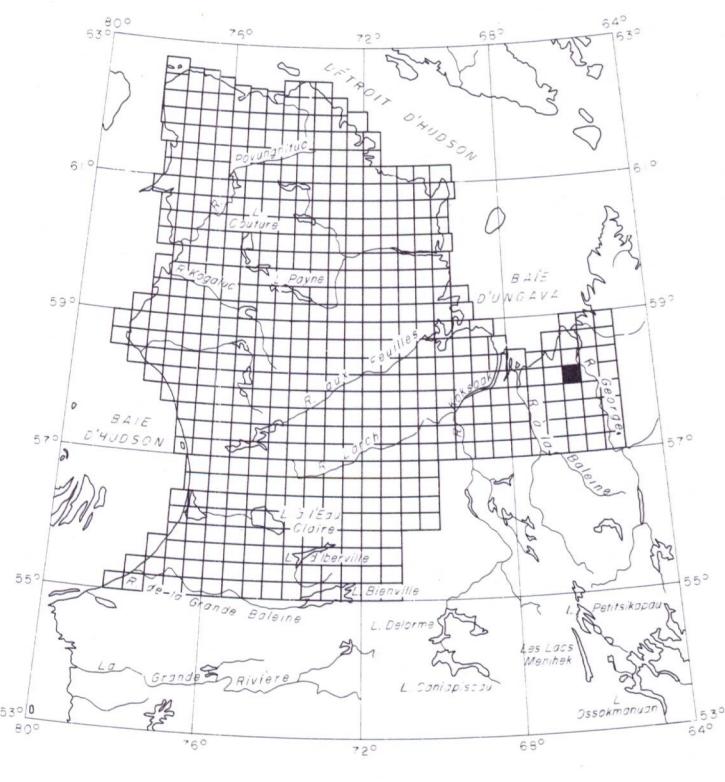

Any further inquiry concerning the map should be addressed to Phototrac Inc. and Geotrex Limited between June, 1973 and September, 1975.

No correction has been made for regional variation.

Base map from maps published by the Surveys and Mapping Branch, Department of Energy, Mines and Resources, Ottawa.
