

CARTE - MAP  
8955 G

LAC BENITA  
QUEBEC

ÉCHELLE 1:50,000 SCALE

ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN S'ADRESSANT À LA DIVISION DES PUBLICATIONS DU MINISTÈRE DES RICHESSES NATURELLES, À QUÉBEC, OU À LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA. COPIES OF THIS MAP MAY BE OBTAINED FROM THE PUBLICATIONS DIVISION OF THE QUEBEC DEPARTMENT OF NATURAL RESOURCES, QUÉBEC CITY, OR FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

LIGNES ISOMAGNÉTIQUES (valeur absolue du champ total)  
ISOMAGNETIC LINES (absolute total field)

500 gammas .....  
100 gammas .....  
20 gammas .....  
10 gammas .....

Dépression magnétique  
Magnetic depression .....

Lignes de vol  
Flight lines .....

1 gamma = 10<sup>-4</sup> tesla en unités SI.  
1 gamma = 10<sup>-4</sup> tesla in SI units.

Altitude du vol: 300 mètres au-dessus du niveau du sol  
Flight altitude: 300 metres above ground level

Courbe de niveau en pieds au-dessus du niveau moyen de la mer  
Elevation contours in feet above mean sea level

This document was produced by scanning the original publication.  
Ce document est le produit d'une numérisation par balayage de la publication originale.

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total field with a resolution of 1 gamma. The flight path of the survey aircraft was recovered from 35 mm track film onto aerial photographs, transferred to a topographical map, reproduced on stable material, and digitized.

After editing the survey data, the coordinates of the intersections of traverses and control lines and differences in their magnetic values were printed out for use in the manual leveling analysis.

The total field values were generated on a 0.3219 cm square grid at the published map scale using Geotrex Limited computer programs; the final aeromagnetic maps were contoured using the computer and digital plotting facilities of Photour Inc.

The data used in compiling this map are available in digital form from the ministère des Richesses naturelles du Québec and the Federal Department of Energy, Mines and Resources, for the cost of retrieval and copying. The analog records are available from the ministère des Richesses naturelles du Québec only.

Aerborne magnetic survey carried out by Photour Inc. and Geotrex Limited between June, 1973 and September, 1975.

No correction has been made for regional variation.

Base map from maps published by the Surveys and Mapping Branch, Department of Energy, Mines and Resources, Ottawa.
