## LAC BÉLANGER

QUÉBEC

ÉCHELLE 1:50,000 SCALE

ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN S'ADRESSANT À LA DIVISION DES PUBLICATIONS DU MINISTÈRE DES RICHESSES NATURELLES DU QUÉBEC OU À LA COMMISSION GÉOLOGIQUE DU CANADA, à OTTAWA. COPIE NUMÉRIQUE DE LA CARTE EST OBTENUE À LA DIVISION DES PUBLICATIONS DU GOUVERNEMENT, DEPARTMENT DE NATURAL RESOURCES, QUÉBEC CITY, OR FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

PUBLIÉE EN 1981 PUBLISHED 1981

LIGNES ISOMAGNÉTIQUES (valeur absolue du champ total)  
ISOMAGNETIC LINES (absolute total field)

- 500 gammes .....
- 100 gammes .....
- 20 gammes .....
- 10 gammes .....

Dépression magnétique  
Magnetic depression  
Lignes de vol  
Flight lines

$1 \text{ gamma} = 10^{-4} \text{ tesla}$  in units SI.  
 $1 \text{ gamma} = 10^{-4} \text{ tesla}$  in units SI.  
Altitude du vol: 300 mètres au-dessus du niveau du sol  
Flight altitude: 300 metres above ground level  
Courbe de niveau en pieds au-dessus du niveau moyen  
Elevation contours in feet above mean sea level

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total magnetic field with a resolution of 1 gamma. The trace of the lines of flight was established on a 0.3219 cm square grid using Geoterrex Limited computer programs. The final aeromagnetic map, reduced from 35 mm track film onto a topographic map, was contoured using the computer and digital plotting facilities of Phototek Inc.

After editing the survey data, the coordinates of the intersections of traverse and control lines and differences in their magnetic values were printed out for use in the magnetic modelling analysis.

The data used in compiling this map are available in digital form from the Richesses naturelles du Québec and the Federal Department of Energy, Mines and Resources, for the cost of retrieval and copying. The analog records may be obtained from the Commission Géologique du Québec.

A magnetic survey was carried out by Phototek Inc. and Geoterrex Limited between June, 1973 and September, 1978.

A magnetic correction has been made to compensate for the variation of the Earth's magnetic field.

No correction has been made for regional variation.

Base map from maps published by the Surveys and Mapping Branch, Department of Energy, Mines and Resources, Ottawa.

This document was produced by scanning the original publication.

Ce document est le produit d'une numérisation par balayage de la publication originale.
