ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN ADRESSANT SA DIVISION DE PUBLICATIONS AU MINISTÈRE DES RICHESSES NATURELLES, À QUÉBEC, OU À LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA. COPIES DE LA CARTE PEUVENT ÊTRE OBTENUES À LA DIVISION DE LA CARTE DE LA PROVINCE, À LA MINISTÉRIE DES RICHESSES NATURELLES, À QUÉBEC, OU À LA DIVISION DE LA CARTE DE LA PROVINCE, À OTTAWA.

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total field with a resolution of 1 gamma. The flight path of the survey aircraft was recovered from the survey data and transferred to a topographic map, reproduced on stable material, and digitized.

After editing the survey data, the coordinates of the intersections of traverses and control lines were transferred to the trapezoidal grid.

The total field values were generated on a 0.3219 cm square grid at the 1:50,000 scale using Geotrex Limited computer programs; the final aeromagnetic map was produced on stable material by Photour Inc.

On peut se procurer les données sous forme digitale à la Direction des Richesses naturelles du Québec et au ministère fédéral de l'Énergie, dans le cadre des services de base fournis par la Commission géologique du Canada. Les données sous forme analogique sont disponibles seulement au ministère des Richesses naturelles du Québec.

Lével aéromagnétique effectué par Photour Inc. et Geotrex Limited entre juin 1973 et septembre 1970.

Une correction a été apportée pour compenser la variation régionale.

Carte de base provenant de cartes publiées par la Direction des Levés et de la Cartographie, ministère de l'Énergie, des Mines et des Ressources, Ottawa.

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total field with a resolution of 1 gamma. The flight path of the survey aircraft was recovered from the survey data and transferred to a topographic map, reproduced on stable material, and digitized.

After editing the survey data, the coordinates of the intersections of traverses and control lines were transferred to the trapezoidal grid.

The total field values were generated on a 0.3219 cm square grid at the 1:50,000 scale using Geotrex Limited computer programs; the final aeromagnetic map was produced on stable material by Photour Inc.

The data used in compiling the map are available, upon request, from the ministère des Richesses naturelles du Québec and the Federal Department of Energy, Mines and Resources, for the cost of retrieval and copying. The analog records are available from the ministère des Richesses naturelles du Québec.

Aeromagnetic survey carried out by Photour Inc. and Geotrex Limited between June 1973 and September 1970.

No correction has been made for regional variation.

Base map from maps published by the Surveys and Mapping Branch, Department of Energy, Mines and Resources, Ottawa.
