

CARTE - MAP

8779 G

LAC VIGNEAU

QUÉBEC

ÉCHELLE 1:50,000 SCALE

LIGNES ISOMAGNÉTIQUES (valeur absolue du champ total)
ISOMAGNETIC LINES (absolute total field)

- 500 gammes
- 100 gammes
- 20 gammes
- 10 gammes
- Dépression magnétique
- Magnetic depression

Lignes de vol

Flight lines

1 gamma = 10^{-4} tesla en unités SI.1 gamma = 10^{-4} tesla in SI units.

Altitude du vol: 300 mètres au-dessus du niveau du sol

Flight altitude: 300 metres above ground level

Courbe de niveau en pieds au-dessus du niveau moyen de la mer

Elevation contours in feet above mean sea level

ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN S'ADRESSANT À LA DIVISION DES PUBLICATIONS DU MINISTÈRE DES RICHESSES NATURELLES DU QUÉBEC OU À LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA. COPIES OF THIS MAP MAY BE OBTAINED FROM THE PUBLICATIONS SECTION OF THE MINISTRY OF NATURAL RESOURCES, QUEBEC CITY, OR FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measures the total field with a resolution of 1 gamma. The flight path of the survey aircraft was recovered from 35 mm track film onto aerial photographs, transferred to a topographical map, reduced to a scale of 1:50,000 and digitized.

After editing the survey data, the coordinates of the intersections of travel lines and control lines and differences in their magnetic values were printed out for use in the initial leveling analysis.

The total field values were generated on a 0.3219 cm square grid at the published map scale using Geoterrex Limited computer programs; the final aeromagnetic maps were contoured using the computer and digital plotting facilities of Photour Inc.

The data used in compiling this map are available in digital form at the ministry des Richesses naturelles du Québec and the Federal Department of Energy, Mines and Resources, for the cost of retrieval and copying. The analog recordings may be obtained from the Commission géologique du Québec only.

Airborne magnetic survey carried out by Photour Inc. and Geoterrex Limited between June, 1973 and September, 1978.

Aucune correction n'a été apportée pour compenser la variation régionale.

Carte de base provenant de cartes publiées par la Direction des levés et de la Cartographie, ministère de l'Énergie, des Mines et des Ressources, Ottawa.
