ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN S'ADRESSANT À LA DIVISION DES PUBLICATIONS DU MINISTÈRE DES RICHESSES NATURELLES, 100, BUREAU A LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA, COPIE NUMÉRIQUE, OU À LA DIVISION DES PUBLICATIONS DIVISION OF THE QUEBEC DEPARTMENT OF NATURAL RESOURCES, QUÉBEC CITY, OR FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

PUBLIÉE EN 1979 PUBLISHED 1979

This map was compiled from digitally recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total field with a resolution of 1 gamma. The flight path of the survey aircraft was recovered photogrammetrically and the survey data were transferred to a topographic map, reproduced on stable material, and digitized.

After editing the survey data, the coordinates of the intersections of traverses and the coordinates of the intersections of magnetic values were printed out for use in the manual levelling analysis.

The total field values were generated on a 0.3219 cm square grid at the published scale. The survey data were contoured using the computer and digital plotting facilities of Phototrac Inc.

The data used in compiling this map are available in digital form from the Quebec Department of Natural Resources and the Canadian Department of Energy, Mines and Resources, for the purpose of copying. The analog records are available from the Quebec Department of Natural Resources.

Airborne magnetic survey carried out by Phototrac Inc. and Geotrex Limited, June 1973 and September 1975.

No correction has been made for regional variation.

Base map from maps published by the Surveys and Mapping Branch, Department of Energy, Mines and Resources, Ottawa.
