QUÉBEC

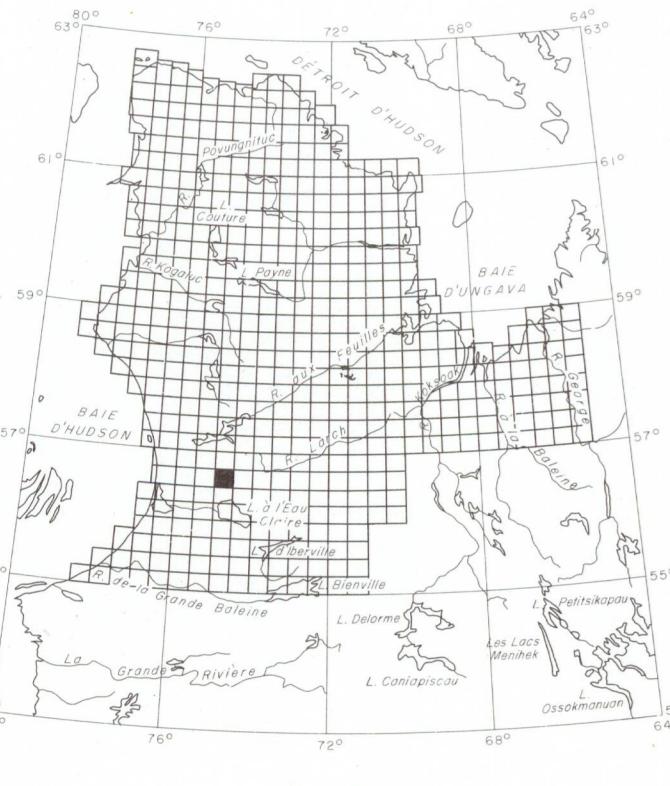

ÉCHELLE 1:50,000 SCALE

LIGNES ISOMAGNÉTIQUES (valeur absolue du champ total)
ISOMAGNETIC LINES (absolute total field)

500 gammes	
100 gammes	
20 gammes	
10 gammes	
Dépression magnétique	
Magnetic depression	
Lignes de vol	
Flight lines	
Altitude du vol: 300 mètres au-dessus du niveau du sol	
Flight altitude: 300 metres above ground level	

121.00

ON PEUT OBTENIR DES EXEMPLAIRES DE CETTE CARTE EN S'ADRESSANT À LA DIRECTION DES RICHESSES NATURELLES DU QUÉBEC, AU MINISTÈRE DES RICHESSES NATURELLES, À QUÉBEC, OU À LA COMMISSION GÉOLOGIQUE DU CANADA, À OTTAWA. COPIERIE NUMÉRIQUE DE LA CARTE EST DISPONIBLE CHEZ LES ÉDITIONS DIVISION OF THE QUEBEC DEPARTMENT OF NATURAL RESOURCES, QUÉBEC, OU FROM THE GEOLOGICAL SURVEY OF CANADA, OTTAWA.

This map was compiled from digitally-recorded aeromagnetic survey data obtained by a proton precession magnetometer which measured the total field with a 500 gamma resolution. A portion of the path of the survey aircraft was recovered from 35 mm track film onto aerial photographs transferred to a topographical map, reproduced on stable material, and digitized.

After the edition of the data, the coordinates of the intersections of traverses and control lines and differences in their magnetic values were put into use in the manual levelling analysis.

The data used in compiling this map are available in digital form at the Quebec Department of Natural Resources and the Canadian Department of Energy, Mines and Resources. The original survey records are available from the Quebec Department of Natural Resources.

Aeromagnetic survey carried out by Photocor Inc. and Geoterrex Limitée entre juin 1973 et juillet 1974.

Acute correction n'a été apportée pour compenser la variation régionale.

Cette carte provient de cartes publiées par la Direction des Levés et de la Cartographie, ministère de l'Énergie, Mines et Ressources, Ottawa.
