PROVINCE DEPARTMENT PROVINCE OF MANITOBA MINES AND TECHNICAL SURVEYS ONTARIO DEPARTMENT OF MINES AND NATURAL RESOURCES DEPARTMENT OF MINES SHEET 53 E GEOLOGICAL SURVEY OF CANADA AEROMAGNETIC SERIES 94°30′ Joins Map 4023G, "York Lake" 94°30′ 94°00′ 25' 20' Joins Map 4021G, "Oasis Lake" PUBLISHED 1966 MAP 4022G The magnetic data on this map were compiled from information recorded along the flight lines shown. The anomalies expressed by the ISOMAGNETIC LINES (absolute total field) magnetic contours are dependent on the variable magnetic intensities of BENSON BAY the underlying rocks, and may be due to conditions near, or at unknown depths below the surface. High magnetic anomalies normally indicate the Airborne Magnetic Survey, April 1965 to December presence of basic rocks, such as diabase, gabbro, or serpentinite, which 1965 by Spartan Air Services Ltd. MANITOBA - ONTARIO have a relatively high iron content, but in special instances may be due, No correction has been made for regional variation. or partly due, to concentrations of magnetic minerals. By means of the magnetic anomalies, various rock bodies or structural features, such The planimetry for this map was reproduced from Scale: One Inch to One Mile = $\frac{1}{63,360}$ as faults or folds, may be traced into, or across, areas of few or no out-1:125,000 unpublished manuscript, obtained from crops. In many instances, however, no interpretation of particular ano-
