 SHEET 79 ^D/_{SW}

Magnetic Survey, May to June 1962, by Hunting Survey Corporation Ltd.
 No correction has been made for regional variation
 Lambert Conformal Projection-standard parallels 78° 15' and 81° 15'

- ISOMAGNETIC LINES (total field):
- 500 gammas
 - 100 gammas
 - 20 gammas
 - 10 gammas
 - Magnetic depression
 - Flight line
 - Flight altitude: 1000 feet above sea-level

DECCA NAVIGATION
 Decca navigation was used in order to direct the course of the aircraft and to determine its track for accurate navigation. For details, see Borden Island Decca Chain, 1962, Computing Devices of Canada, Limited, Ottawa. In the area south and east of a line joining the master to the Red Slave station, the theoretical positions of the decca lanes were corrected using a phase lag correction map, supplied by Computing Devices of Canada Limited.
