# ANNAPOLIS NOVA SCOTIA

Scale: One Inch to Four Miles =  $\frac{1}{253,440}$   
Miles

The aeromagnetic survey for the one-mile sheets 21 A/1, 21 A/2, 21 A/3, 21 A/4, 21 A/5, 21 A/6, 21 A/7, and 21 A/8 was conducted in 1956 by the Geological Survey of Canada at a flight altitude of 1000 feet above ground level.

The aeromagnetic survey for the one-mile sheets 21 A/9, 21 A/10, 21 A/11, 21 A/12, 21 A/13, 21 A/14, 21 A/15 and part of 21 A/9 and 21 A/16 was conducted by the Geological Survey of Canada in 1958 at a flight altitude of 1000 feet above ground level. For flight lines over the water, Nova Scotia Decca Chain 7 was used as a navigational aid.

The aeromagnetic survey for part of 21 A/9 and 21 A/16 was conducted by the Geological Survey of Canada in 1962 at a flight altitude of 1000 feet above ground level. No correction has been made for regional variation for 1956, 1958 or 1962 survey.

The aeromagnetic survey for 21 A/11; 21 A/16 and part of 21 A/12 was conducted in 1954 by Canadian Aero Service Ltd. for Gordon Minerals Ltd. at a mean terrain clearance of 450 feet. The original data were recontoured at 10 gamma intervals and drafted to conform with the Geological Survey of Canada contour format. No correction has been made for regional variation.

Recontouring and drafting by Lockwood Survey Corporation Ltd.
