The airborne magnetic survey of the one-mile sheet for 11 E/2; 11 E/3; 11 E/4; 11 E/5; 11 E/6; 11 E/7; 11 E/8; 11 E/9; 11 E/10; 11 E/11; 11 E/12; 11 E/13; 11 E/14; 11 E/15; and part of sheet 11 E/9 and 11 E/16 was conducted in 1958 by the Geological Survey of Canada at a flight altitude of 1000 feet above ground level. For flight lines over the water, Nova Scotia Decca Chain 7 was used as a navigational aid. For part of 11 E/9 and 11 E/16 the airborne magnetic survey was conducted in 1962 by the Geological Survey of Canada at a flight altitude of 1000 feet above ground level. No correction has been made for regional variation.

The airborne magnetic survey for 11 E/1, 11 E/8 and part of 11 E/9 was conducted in 1954 by Canadian Aero Service Limited for Gordon Minerals Limited at a flight altitude of 500 feet above ground level. The original compilation was under the supervision of personnel of Canadian Aero Service Ltd. The contours were recontoured to conform with the Geological Survey of Canada contour format. No correction has been made for regional variation.

Recontouring and drafting by Lockwood Survey Corporation Limited.
