

AEROMAGNETIC SERIES

MAP 7037G

FREDERICTON NEW BRUNSWICK

Scale: One Inch to Four Miles = $\frac{1}{253,440}$
Miles

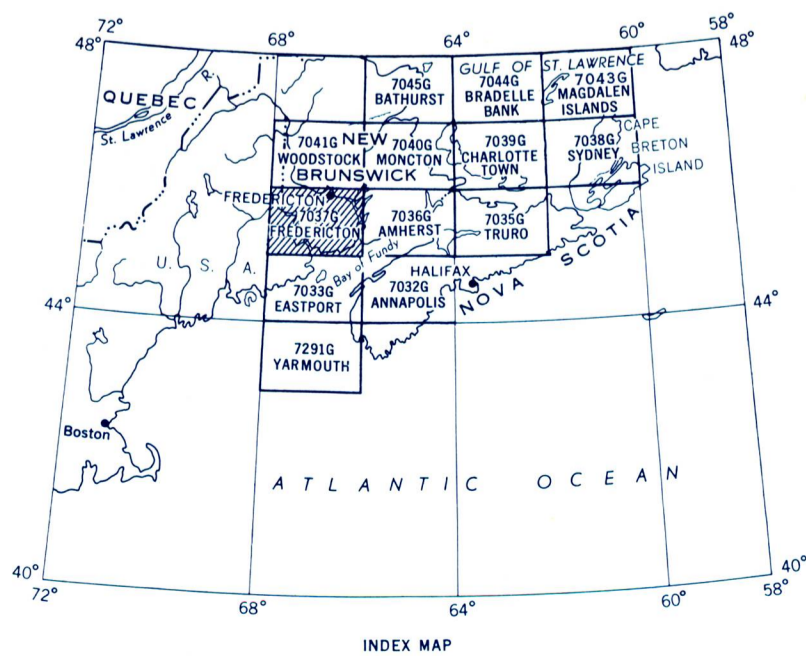

Airborne Magnetic Survey, January to March 1950, and May to September 1958,
by the Geological Survey of Canada, Department of Mines and Technical Surveys.

No correction has been made for regional variation.

One-mile sheets 21 G-12, G-13 and G-14, were flown at a mean terrain clearance
of 500 feet. The remainder of this sheet was flown at 1000 feet.
