The airborne magnetic survey covering one-mile map sheets 10M/1, 10M/2, 10M/7, 10M/8, 10M/9, 10M/10, and 10M/15 and part of 10M/3, 10M/6, 10M/11, 10M/14 and 10M/16 was conducted between May and October, 1962 by 415 Squadron RCAF Summerside at 200 feet above sea-level. Compilation by the Geological Survey of Canada.
A correction has been applied to these sheets for regional variation of the earth's magnetic field; this regional variation decreases at a uniform rate of 6.3 gammas per mile in a direction 35° east of south.

The ship magnetometer survey of one-mile map sheets 10M/4, 10M/5, 10M/12, 10M/13 and part of 10M/3, 10M/6, 10M/11, 10M/14 and 10M/16 was carried out between May and October, 1962 by the Geological Survey of Canada.
No correction has been made for regional variation.
Bathymetric contours in feet below sea-level. 200'
