

POLAR CONTINENTAL SHELF SHEET 99 E

MAP 8129 G

DISTRICT OF FRANKLIN NORTHWEST TERRITORIES

Scale: One Inch to Four Miles = $\frac{1}{253,440}$ MILES COPIES OF THIS MAP MAY BE OBTAINED FROM THE DIRECTOR, GEOLOGICAL SURVEY OF CANADA, OTTAWA.

> The area northeast of Decca lane F 12 has been surveyed by Canadian Aero Service Ltd. in 1964.

Bathymetric contours in metres below sea-level _______

ISOMAGNETIC LINES 100 gammas.....

PUBLISHED 1968

50 gammas..... 10 gammas.... 5 gammas..... Magnetic Depression..... Flight Line A 20 B 40

Flight altitude: 1000 feet above sea-level. No correction has been made for regional variation. Airborne Magnetic Survey, May 1966 to May 1967 by Spartan Air Services Ltd., Ottawa.

Decca navigation was used in order to direct the course of the aircraft and to determine its track for accurate navigation. The Decca lanes as shown on this map are the theoretical positions of the Decca lattice for the Cape Andreasen Decca Chain 1965-66 and indicate the approximate track of the survey aircraft. The position of the magnetic control lines, as established from recorded Decca fixes, indicate the actual track of the survey aircraft. For details, see Cape Andreasen Decca Chain, 1965-66, Computing Devices of Canada Ltd., Ottawa. Lambert Conformal Projection—standard parallels 76°46'30" and 79°49'30".
