LEGEND

Weighted legend blocks indicate map units that appear on this map

EAST — WEST

CENOZOIC

QUATERNARY
PLEISTOCENE AND RECENT

- Qal — *Gravel, sand, silt; clay, and till*

CRETACEOUS
UPPER CRETACEOUS (Cenomanian)

- Kd — *DUNVEGAN FORMATION: sandstone, shale, and conglomerate*

LOWER CRETACEOUS (Albian) AND UPPER CRETACEOUS (Cenomanian)
FORT ST. JOHN GROUP (Kkr - Kfu)

- KSu — *SULLY FORMATION: sideritic shale, siltstone; marine. Includes some Upper Cretaceous beds at the top*
- KSk — *SIKANNI FORMATION: fine grained sandstone, minor shale, coal, and conglomeratic; marine*
- KHu — *HULCROSS FORMATION: dark grey, concretionary shale; marine*
- KGt — *GATES FORMATION: massive- to thick-bedded sandstone; platy sandstone and shale; silty mudstone*
- KM — *MOOSEBAR FORMATION: dark grey shale; marine*

→ KFJ — *FORT ST. JOHN GROUP: undivided (schematic)*

LOWER CRETACEOUS (Barremian-Aptian)
BULLHEAD GROUP (Kcu - Kcl)

- KGj — *GETHING FORMATION: fine grained sandstone; minor shale, coal, and conglomeratic; marine and nonmarine*
- KCd — *CADOMIN FORMATION: massive conglomerate and conglomeratic sandstone; nonmarine*

→ KCG — *BULLHEAD GROUP (CADOMIN / GETHING FORMATION(S)- undivided (structure section)*

MESOZOIC

JURASSIC AND CRETACEOUS
UPPER JURASSIC(?) AND LOWER CRETACEOUS (Tithonian-Valanginian)
MINNES GROUP (Kbi - Kls)

- KBi — *BICKFORD FORMATION: interbedded, fine grained sandstone and shale*
- KMh — *MONACH FORMATION: massive, quartzitic sandstone*
- KBp — *BEATTIE PEAKS FORMATION: interbedded, fine grained sandstone and shale; marine. May possibly include Monach Formation equivalents*
- JKM — *MONTEITH FORMATION: massive, quartzitic sandstone. May include some Jurassic strata*

→ KBB — *BEATTIE PEAKS FORMATION and younger beds: interbedded, fine grained sandstone, and shale; marine. May include the Monach and Bickford formations*

→ JKMn — *MINNES GROUP (undivided)*

JURASSIC
LOWER AND UPPER JURASSIC (Sinemurian?-Tithonian)

- Jf — *FERNIE FORMATION: phosphatic and sideritic shales; siltstone; minor sandstone; marine*

TRIASSIC
UPPER TRIASSIC (Norian)

- TP — *PARDONET FORMATION: carbonaceous and argillaceous limestone; silty limestone; calcareous and dolomitic siltstone*

→ TBP — *BALDONNEL AND PARDONET FORMATIONS (undivided)*

UPPER TRIASSIC (Karnian)

- TB — *BALDONNEL FORMATION: massive limestone and dolostone with siltstone and sandstone interbeds*
- TC — *CHARLIE LAKE FORMATION: dolomitic and calcareous sandstone; siltstone; sandy limestone; dolostone; and minor breccia (structure section)*

→ TLC — *LIARD AND CHARLIE LAKE FORMATIONS (undivided)*

MIDDLE AND UPPER TRIASSIC (Ladinian-Karnian)

- TL — *LIARD FORMATION: massive, dolomitic to calcareous sandstone; calcareous and dolomitic siltstone; minor dolostone (structure section)*

LOWER AND MIDDLE TRIASSIC (Griesbachian-Ladinian)

- TTG — *TOAD AND GRAYLING FORMATIONS: recessive, calcareous siltstone; silty limestone; silty shale; minor silty dolostone and calcareous sandstone*

→ TTu — *TOAD AND GRAYLING, LIARD, CHARLIE LAKE, BALDONNEL, AND PARDONET FORMATIONS (undivided)*

→ TLu — *LUDINGTON FORMATION: dolomitic to calcareous siltstone and sandstone; finely crystalline limestone; bioclastic limestone. Equivalent to Liard, Charlie Lake, and Baldonnel formations.*

PERMIAN
LOWER AND UPPER PERMIAN (Artinskian-Wordian)

- PF — *FANTASQUE FORMATION: massive, grey chert containing abundant sponge spicules*

LOWER PERMIAN (Asselian-Sakmarian)

- PK — *KINDLE FORMATION: siltstone; shale; and limestone. Mapped as part of the Stoddart Group (schematic)*

CARBONIFEROUS AND PERMIAN
LOWER CARBONIFEROUS TO LOWER PERMIAN

- CPS — *STODDART GROUP AND KINDLE FORMATION (undivided)*

CARBONIFEROUS
LOWER CARBONIFEROUS (upper Visean-lower Namurian)
STODDART GROUP

- CS — *GOLATA, KISKATINAW, and TAYLOR FLAT FORMATIONS (undivided); shale; sandstone; limestone; and siltstone (structure section)*

LOWER CARBONIFEROUS (upper Tournaisian-lower Visean)
PROPHET FORMATION (CP1 - CP2)

- CP2 — *Upper unit: massive, light grey limestone, and chert*
- CP1 — *Lower and middle units: limestone; chert; dolostone; shale, and siltstone*

→ CP — *PROPHET FORMATION (undivided): massive limestone; dolostone; chert*

→ CPS + CP — *CARBONIFEROUS AND PERMIAN LOWER CARBONIFEROUS TO LOWER PERMIAN: STODDART GROUP, KINDLE AND FANTASQUE FORMATIONS: undivided (structure section)*

DEVONIAN AND CARBONIFEROUS
UPPER DEVONIAN-LOWER CARBONIFEROUS

- DCB — *BESA RIVER FORMATION: shale; calcareous shale; siltstone; calcareous siltstone; silty limestone; and limestone. Limestone marker unit (DCb) : limestone; and silty, nodular limestone (structure section)*

DEVONIAN
MIDDLE DEVONIAN

- DD — *DUNEDIN FORMATION: limestone; dolostone; argillaceous limestone; secondary, coarsely crystalline dolomite*

LOWER AND MIDDLE(?) DEVONIAN
STONE FORMATION (Ds1 - Ds2)

- DS2 — *Upper unit: massive, light grey, medium crystalline dolostone (structure section)*
- DS1 — *Lower unit: medium- to thick-bedded, ochre and grey weathering, sandy dolostone and dolomitic, quartz sandstone (not mapped)*

→ DS — *STONE FORMATION (undivided): dolostone; dolomitic quartz sandstone; quartz sandstone; medium- to thick-bedded light grey and light ochre*

SILURIAN(?) AND DEVONIAN
UPPER SILURIAN(?) TO MIDDLE(?) DEVONIAN

- SDMS — *MUNCHO-McCONNELL AND STONE FORMATIONS: undivided (structure section)*

→ SDMD — *SILURIAN(?) AND DEVONIAN UPPER SILURIAN (?) TO MIDDLE DEVONIAN: MUNCHO-McCONNELL, STONE, AND DUNEDIN FORMATIONS (undivided)*

SILURIAN(?) AND DEVONIAN
UPPER SILURIAN(?) AND LOWER DEVONIAN

- SDM — *MUNCHO-McCONNELL FORMATION: thin-bedded to massive, light grey dolostone and sandy dolostone*

SILURIAN
LOWER SILURIAN (upper Llandoverian)

- SN — *NONDA FORMATION: dolostone; limestone; carbonaceous limestone and dolostone; black chert nodules and lenses*

ORDOVICIAN
UPPER ORDOVICIAN (upper Caradocian-?Ashgillian)

- OSd — *Quartzite-dolomite unit: quartzite; dolomitic quartz sandstone; microcrystalline dolostone with black chert nodules; carbonaceous, nodular limestone*

LOWER AND MIDDLE ORDOVICIAN (Llanvirnian-Caradocian)

- OS — *SKOKI FORMATION: dolostone; carbonaceous and argillaceous dolostone; argillaceous limestone; dolomitic siltstone*
- OSv — *Volcanic marker unit (OSv): basaltic flows; pyroclastics; resedimented volcanic sandstone and conglomerate*

CAMBRIAN AND ORDOVICIAN
UPPERMOST CAMBRIAN AND LOWER ORDOVICIAN (Trempealeauan-Arenigian)
KECHIKA GROUP

- €Ok — *Cleaved, phyllitic, calcareous siltstone and shale; silty limestone; wavy banded limestone; sandstone; minor, green weathering, altered volcanic beds*

CAMBRIAN
MIDDLE (?) CAMBRIAN

- Cd — *Dolomite unit: medium crystalline dolostone; sandy dolostone*

LOWER CAMBRIAN

- Cs — *Quartzite unit: orthoquartzite; calcareous shale; silty quartzite; siltstone; shale . Probable equivalent of the Gog Group*

PROTEROZOIC

UPPER PROTEROZOIC
MISINCHINKA GROUP

- PM — *Phyllitic and schistose pelitic quartzite; minor limestone.*
- PM2 — *Carbonate marker unit (PM2): massive limestone and dolostone. Possible equivalent of the Byng Formation*

PALEOZOIC

ROAD RIVER "STRATA"

DEVONIAN
LOWER(?) AND MIDDLE DEVONIAN (?Eifelian)

- Dqs — *Dolomitic quartz sandstone unit: quartz sandstone with dolomite cement*

SILURIAN AND DEVONIAN
UPPER SILURIAN AND LOWER DEVONIAN (Ludlovian into ?Eifelian)

- SDbs — *Brown siltstone unit: siltstone; shale; limestone; quartz sandstone; and chert*

SILURIAN
LOWER SILURIAN (Llandoverian)

- Sb — *Breccia unit: breccia composed of angular, lithic dolomite clasts in dolomite cement; chert lenses; carbonaceous limestone and dolostone beds near base*
- Scl — *Carbonaceous limestone unit: carbonaceous limestone; calcareous shale; limestone; and graptolitic shale. May include beds of Late Ordovician age*

ORDOVICIAN AND SILURIAN
MIDDLE ORDOVICIAN TO LOWER SILURIAN

- OSR — *Graptolitic shale-quartzite unit and Carbonaceous limestone unit (undivided)*

ORDOVICIAN
MIDDLE AND UPPER ORDOVICIAN (Caradocian into Ashgillian)

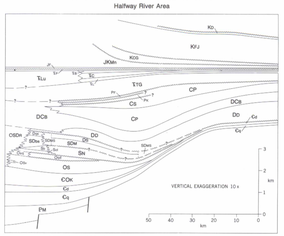
- Osq — *Graptolitic shale-quartzite unit: shale; calcareous shale; siltstone; argillaceous limestone; and quartz sandstone turbidites*

ORDOVICIAN, SILURIAN AND DEVONIAN
MIDDLE ORDOVICIAN TO MIDDLE DEVONIAN

- OSDn — *ROAD RIVER "STRATA" (undivided)*

SCHEMATIC STRATIGRAPHIC RELATIONSHIPS

Halfway River Area



Unconformity (defined; approximate)

Geological boundary (defined, approximate, assumed)
Boundary of Quaternary sediments
Facies boundary
Bedding, tops known (inclined, vertical, overturned)
Fault, extension (symbol also applied to vertical faults; solid circle indicates downthrow side; defined, approximate, assumed)
Thrust fault (synonymous with contraction fault; teeth indicate upthrust side; defined, approximate, assumed)
Anticline (trace of axial plane; overturned)
Syncline (trace of axial plane; overturned)
Fossil locality, GSC catalogue number
Measured stratigraphic section (see text for field section data)
Dotted line denotes change in mapping precision. Stratigraphic subdivisions are amalgamated at dotted line
Line of section

Geology by R.I. Thompson, 1975-76, assisted by Douglas Nisakes and Robin Day, 1975 and Scott Trollope and Neil Godfrey, 1976

Geological compilation by R.I. Thompson

Geological cartography by S.D. Orzeck, Institute of Sedimentary and Petroleum Geology, Geological Survey of Canada

Any revisions or additional geological information known to the user would be welcomed by the Geological Survey of Canada

Base map at the same scale published by the Surveys and Mapping Branch in 1983

Copies of the topographical edition covering this map area may be obtained from the Canada Map Office, Department of Energy, Mines and Resources, Ottawa, Ontario, K1A 0E9

Approximate magnetic declination 1986, 26°17' East, increasing 18.6' annually

Elevations in feet above mean sea level
