

## BEDROCK GEOLOGY LABRADOR SEA

## GÉOLOGIE DU SOUBASSEMENT MER DU LABRADOR

### CONTRIBUTORS COLLABORATEURS

R.J.W. Douglas, W.H. Poole, B.V. Sanford, A.C. Grant, J.A. Wade, M.S. Barss

#### *J. S. Bell*

This map is derived from Map 1401A of the Geological Survey of Canada (1979). The Paleozoic outcrop pattern on the seafloor north of Newfoundland was modified as suggested by Bell and Howie (in press), and the Mesozoic edge on the Labrador Shelf was adjusted to follow the configuration of Balkwill (1987). The onshore outcrop of Mesozoic breccias cut by dykes discovered by King and McMillan (1975) at Fords Bight on the Labrador Coast was also added.

#### *J. S. Bell*

Cette carte est dérivée de la carte 1401A, publiée par la Commission géologique du Canada (1979). Nous en avons modifiée le patron de l'affleurement paléozoïque au fond de la mer au nord de Terre-Neuve comme Bell et Howie (sous presse) l'ont suggéré. Nous avons également corrigé la bordure des roches mésozoïques au fond de la mer sur le plateau continental du Labrador en accord avec la configuration publiée par Balkwill (1987). Une autre addition consiste en l'affleurement continental de brèches mésozoïques, coupées des filons rocheux, à Fords Bight sur la côte du Labrador, telles que découvertes par King et McMillan (1975).
