Introduction

The first Index to Publications issued by the Geological Survey covered the period 1863-1884. Subsequent indexes covered 1885-1906, 1907-1909, 1910-1926 and 1927-1950. No subject indexes were issued after 1950 but publications listings covering 1845-1958, 1959-1974, 1975-1979 and 1980-1984 were issued.

The Geological Survey has since 1981 managed GEOSCAN, a computer-based bibliographic database which co-ordinates input from the ten provinces, and several federal agencies and other geoscience agencies. Since 1975 GSC indexes have been produced from this database.

This index comprises listings by:

- publication
- author
- NTS (National Topographic System) area

Users who require access to subject listings are encouraged to contact the:

National GEOSCAN Centre
Room 180 601 Booth Street
Ottawa, Ont. K1A 0E8
(613) 992-9550

or provincial geoscience agencies who can also supply access to the shared database. It is expected that GEOSCAN will be publicly accessible through a commercial vendor by 1990.

This index is available in both hard copy and on IBC-PC compatible 5 1/4" floppy diskette (diskette is available from GSC Ottawa only). For price lists and for other information concerning Geological Survey of Canada publications contact:

Introduction

Le premier index des publications édités par la Commission géologique couvrait la période 1863-1884. Les index subséquents couvraient les périodes suivantes: 1885-1906, 1907-1909, 1910-1926 et 1927-1950. Les index classés par sujet n'ont pas été publiés après 1950, par ailleurs les listes des publications ont été publiées au cours des périodes 1845-1958, 1959-1974, 1975-1979 et 1980-1984.

La Commission géologique a depuis 1981 géré GEOSCAN, un système de renseignements bibliographiques informatisé comprenant dix partenaires provinciaux et plusieurs agences fédérales et des agences géoscientifiques. Depuis 1975 les index de la CGC ont été réalisés à partir de ce système.

L'index comprend des listes classées comme suit:

- par publication
- par auteur
- suivant les régions du SNRC (Système national de référenc ecartographique)

Les usagers qui veulent se référer aux listes classées par sujet doivent s'adresser à l'endroit suivant:

Centre national GEOSCAN
Pièce 180 601 rue Booth
Ottawa, Ontario, K1A 0E8
(613) 992-9550

ou aux agences géoscientifiques provinciales qui peuvent aussi donner accès à la base de données partagée. Il est à prévoir que GEOSCAN va devenir plus accessible au public par l'intermédiaire de représentants commerciaux vers 1990.

Cet index est disponible sous forme d'imprimés et sur disquettes compatibles et flexibles de 5 1/4" (ces disquettes sont disponibles à la CGC d'Ottawa). Pour les listes des prix et pour de plus amples renseignements sur les publications de la Commission géologique, prière de vous adresser à l'endroit suivant:
