

LEGEND

- UNIT 5**
- 5 - Postglacial ponded mud
 - 5B - Postglacial sand
 - 5B/3 - Winnowed sandy mud/muddy sand over till
 - 5/3 - Discontinuous postglacial mud over till
- UNIT 4**
- 4 - Glaciomarine stratified sediments
 - 4/3 - Discontinuous stratified glaciomarine sediments over till
- UNIT 3**
- 3 - Upper till
 - 3A - Lower till(s)
 - 3/2 - Discontinuous till over bedrock
 - UN - Till based on surface morphology only
 - CX - Complex/undefined
- UNITS 1 AND 2**
- 2 - Paleozoic bedrock
 - SF - Smooth featureless seafloor (probably bedrock)
 - 1 - Acoustic basement with isolated pockets of glacial/postglacial sediments

--- Limit of interpretation

NOTE:
The surficial geological units are based on interpretation of 3.5 kHz, Huntex D.T.S., and 40 cubic inch airgun data. The location of these seismic data is shown on the track chart.
A more detailed display of this data may be obtained from the authors in map form at a scale of 1:500,000.
