

McBETH FIORD (27C)
 DISTRICT OF FRANKLIN NORTHWEST TERRITORIES
GEOLOGY

LEGEND

Geological mapping by R. Anderson, S. Aungst,
 D. Brown, J. Henderson, M. Henderson,
 P. McLellan, G. Peterson, and C. Tippet (1979).
 Geological map compiled by J.R. Henderson (1980)

- Formational contact (known, assumed)
- Bedding (Piling Group) or gneissosity (Basement Complex)
- Mineral foliation and lineation (S₁ and L₁)
- Isoclinal fold axial surface and hinge line (S₂ and L₂)
- Open fold axial surface and hinge line (S₃ and L₃)

- Hadrynian
Franklin Intrusions
- Diabase dykes

- Aphebian
Piling Group
- Rhythmically interbedded graphitic psammitic and pelitic metasediments
- Rusty weathering graphitic metapelite
- Marble and calcium-silicate beds
- Quartzite and impure quartzite

- Archean
Basement Complex
- Amphibolite
- Layered granitoid gneisses with amphibolite boudins
