**AIRBORNE RADIOACTIVITY MAP**  
**MONT-LAURIER**  
**QUEBEC**

THORUM (241-281 MA)

The gamma radiation contours shown on the map are based on measurements made on the ground. The contours are based on the mean of the measurements made at a mean height of 100 feet above the ground. The contours are based on the mean of the measurements made at a mean height of 100 feet above the ground. The contours are based on the mean of the measurements made at a mean height of 100 feet above the ground.
