THORIUM: POTASSIUM RATIO

The gamma radiation recorded above the ground from the potassium and thorium isotopes is measured in counts per minute. The recorded data are presented in this map as a 1 km x 1 km grid. The data are presented in a color scale from 0.1 to 1.0 percent Potassium to Thorium ratio. The data are presented in a color scale from 0.1 to 1.0 percent Potassium to Thorium ratio. The data are presented in a color scale from 0.1 to 1.0 percent Potassium to Thorium ratio.

Map prepared by the Geological Survey of Canada, Ottawa, Ontario, Canada, 1971. The map is based on data collected by the Geological Survey of Canada, Ottawa, Ontario, Canada, 1971.
