

**AIRDORNE RADIOACTIVITY MAP
DISTRICT OF MACKENZIE
NORTHWEST TERRITORIES
SVA DCEGH
INTEGRAL**

The Airdorne Survey of radionuclides in the District of Mackenzie, Northwest Territories, was conducted by the Geological Survey of Canada in 1972 and 1973. The results of this survey are presented in this map. The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map. The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The data have been corrected for background, height, and other factors. The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.

The map shows the distribution of radionuclides in the area, as determined by the Airdorne Survey. The map is based on data collected by the Airdorne Survey, and is presented in the form of a contour map.
