

Statistical Symbols and Data Presentation

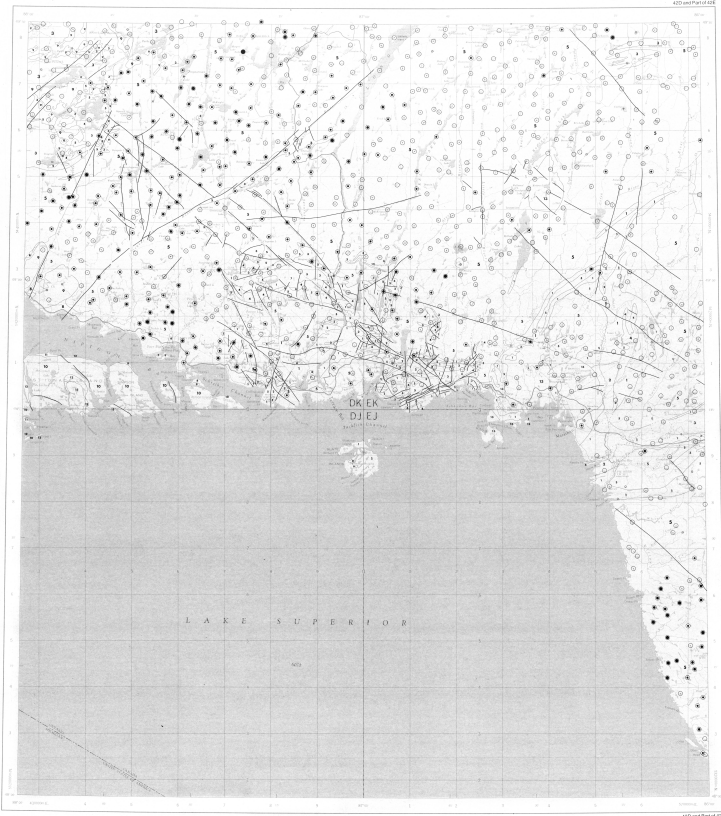

The presentation of a sample of N objects (1) is graphically represented in a set of 15 symbols. (2) A sample size of 100 is used in the following examples. The symbols are presented in the order in which they are used. The symbols are presented in the order in which they are used. The symbols are presented in the order in which they are used.

The data are presented in a set of 15 symbols. The symbols are presented in the order in which they are used. The symbols are presented in the order in which they are used. The symbols are presented in the order in which they are used.
