OPEN FILE 869

LITHOLOGICAL, STRUCTURAL AND RADIOMETRIC MAPS  
OF THE MEKOOS AREA NEAR MONT LAURIER, QUEBEC

by

M.N. Henderson

This open file consists of an outcrop location and lithologies map, a structural data map and a map of uranium anomalies. These three page-size maps, scale approximately 1:12 800, complement the report: "Lithological and structural setting of uraniferous pegmatites near Mekoos (Mont Laurier, Que.); in Current Research, Part A, Geological Survey of Canada, Paper 82-1A, p. 261-264. The original maps, scale 1:8 000, are deposited in the GSC Central Uranium Files.
