

Note: This legend is common for National Geochemical Reconnaissance Map 37-1978, Open File 557; Map 38-1978, Open File 558; Map 39-1978, Open File 559; Map 40-1978, Open File 560.

SEDIMENTARY, VOLCANIC AND METAMORPHIC ROCKS

TRIASSIC  
[26] (VCRK) Andesitic volcanics and shallow intrusives of the Mistastin Formation

HADRYDIAN AND/OR NEOHELIKIAN  
[25] (ARXS) Red conglomerate, arkose and siltstone

GRENVILLE PROVINCE  
APHEBIAN AND EARLIER (?)  
[24] (GRNG) Metasedimentary granitoid gneisses, minor amphibolite, sillimanite gneiss, metaquartzite, marble  
SUPERIOR PROVINCE

ARCHEAN  
[23] (PXGL) Pyroxene granulite, unseparated acidic intrusives  
CHURCHILL PROVINCE

HELIKIAN  
NEOHELIKIAN  
[22] (SMRK) Quartzite, conglomerate, arkose, shale-Shipiskan Formation

PALEOHELIKIAN  
[21] (QRTZ) Quartzite, grit and conglomerate of Sims Formation

APHEBIAN  
[20] (BSLT) Basaltic flows and pyroclastics, quartzite, greywacke, slate, argillites, conglomerate, minor iron formation  
[19] (SMRK) Grit, arkose, conglomerate, quartzite, greywacke, slate, acidic to basic volcanics, dolomite, limestone, chert breccia  
[18] (SLTE) Ferruginous slate and iron formation

APHEBIAN AND EARLIER (?)  
[17] (GRNL) Granulite, pyroxene gneiss, charnockite, minor granitic gneiss, mylonitic gneiss, amphibolite, ultrabasic intrusives  
[16] (GRGS) Garnet-quartz-feldspar gneiss, chiefly mylonitized, locally graphitic  
[15] (GRNG) Granitic gneiss, granodioritic gneiss, migmatite, agnate, amphibolite  
[14] (PRGS) Paragneiss: includes biotite-quartz-feldspar gneiss, garnet-biotite-quartz-feldspar gneiss, hornblende-gneiss, augen and graphitic gneiss  
[13] (AMPB) Amphibolite, pyroxene amphibolite, chlorite schist, garnet- and biotite-rich gneisses  
[12] (MSDM) Metasedimentary rocks, mainly quartzite and marble

NAIN PROVINCE  
APHEBIAN  
[11] (SLTE) Slate, argillite, siltstone, quartzite, greywacke, dolomite and basalt of LOWER CROTEAU GROUP  
ARCHEAN  
[10] (SCST) Mafic schistose rocks, greenstone, metasedimentary rocks, amphibolite, minor ultrabasic intrusives  
[9] (GRGG) Granitic and granodiorite gneiss, migmatite, granulite and amphibolite

INTRUSIVE ROCKS  
HELIKIAN  
PALEOHELIKIAN  
[8] (GRNT) Granite, quartz monzonite, granodiorite, quartz diorite, syenite  
[7] (QZMZ) Adamellite suite: adamellite, monzonite, syenite, granodiorite, granite and their hypersthene-bearing equivalents forssundite, mangerite, opdalite and charnockite  
[6] (ANRS) Anorthosite suite: anorthosite, anorthositic gabbro, leucotroctolite

[5] (UMFC) Gabbro, norite, anorthositic gabbro, troctolite, diorite, derived basic gneiss and amphibolite  
PALEOHELIKIAN AND EARLIER (?)  
[4] (GRDR) Granitic to granodiorite, massive to poorly foliated, with inclusions of granitic gneiss  
[3] (GRNT) Granite, quartz monzonite, granodiorite, quartz diorite  
[2] (GGBR) Gabbro, metagabbro, glomerophyritic gabbro and diorite  
ARCHEAN  
[1] (PYGD) Massive to poorly foliated pyroxene-bearing granodiorite and syenodiorite.

\*A four letter mnemonic name recorded as rock type as part of field observations.

Geological boundary.....  
Fault.....  
Mainly acidic volcanic rocks.....  
Mainly basic volcanic rocks.....  
No analytical result.....

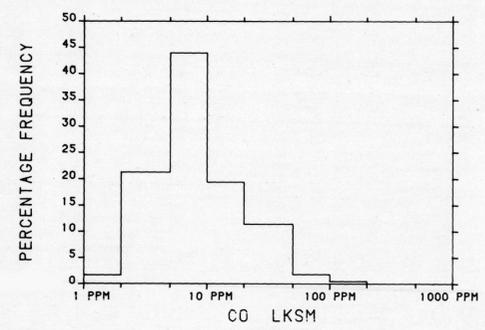

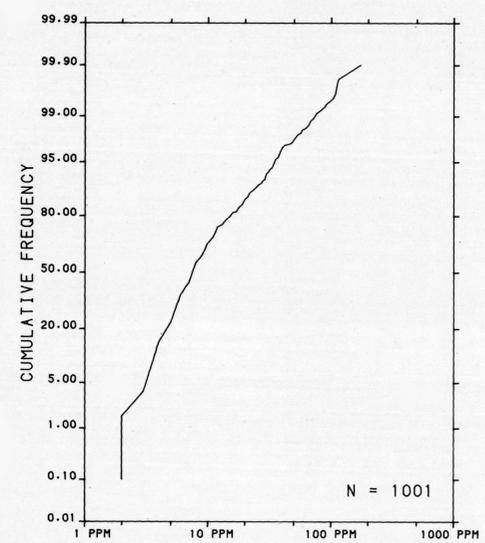

This legend was modified and the geology derived for this geochemical map from Geology Map of Labrador, Mineral Resources Division, Department of Mines, Agriculture and Resources, Province of Newfoundland and Labrador.

Geological Survey of Canada  
Resource Geophysics and Geochemistry Division  
and  
Newfoundland Department of Mines and Energy

CONTRACTORS

Sample collection by Marshall Macklin Monaghan Ltd.  
Sample preparation by Golder Associates.  
Uranium in sediment chemical analyses by Atomic Energy of Canada Ltd.  
Other sediment chemical analyses by Chemex Labs Ltd.  
Water chemical analyses by Barringer Magenta Ltd.

This map forms one of a series of 68 maps released by the Geological Survey of Canada, Open Files 557, 558, 559 and 560. Each Open File consists of maps for 12 elements for lake sediments, 2 elements for lake water, and 1 each for sample site location, sediment loss on ignition and water pH.

Copies of map material and listings of field observations and analytical data, from which the material was prepared, may be available at users expense by application to:

K.G. Campbell Corporation  
880 Wellington St.,  
Bay 238  
Ottawa, Ontario  
K1R 6K7

The data is also available in digital form. For further information please contact:
