MAP 1-1969 GEOLOGICAL SURVEY OF CANADA DEPARTMENT OF ENERGY, MINES AND TECHNOLOGY FIELD PARTIES, 1969 Scale of Miles 0 200 400 600 The Geological Survey plans some 489 active scientific projects for the fiscal year 1969-70. About 221 of these will result in field parties. These parties range in size and effort from one geologist (hotted for a few days to a major operation occupying the entire field season. About 187 of these parties are plotted on this map. Others, including those involving widely scattered field areas, could not be plotted readily. Many of these are listed under "Others". Conventional Federal-Provincial aeromagnetic surveys are not shown. All enquiries should quote project numbers. Primary quadrangle number according to the National Topographic System. 57 Compiled to May 2, 1969.
