Sheet 5 of 5

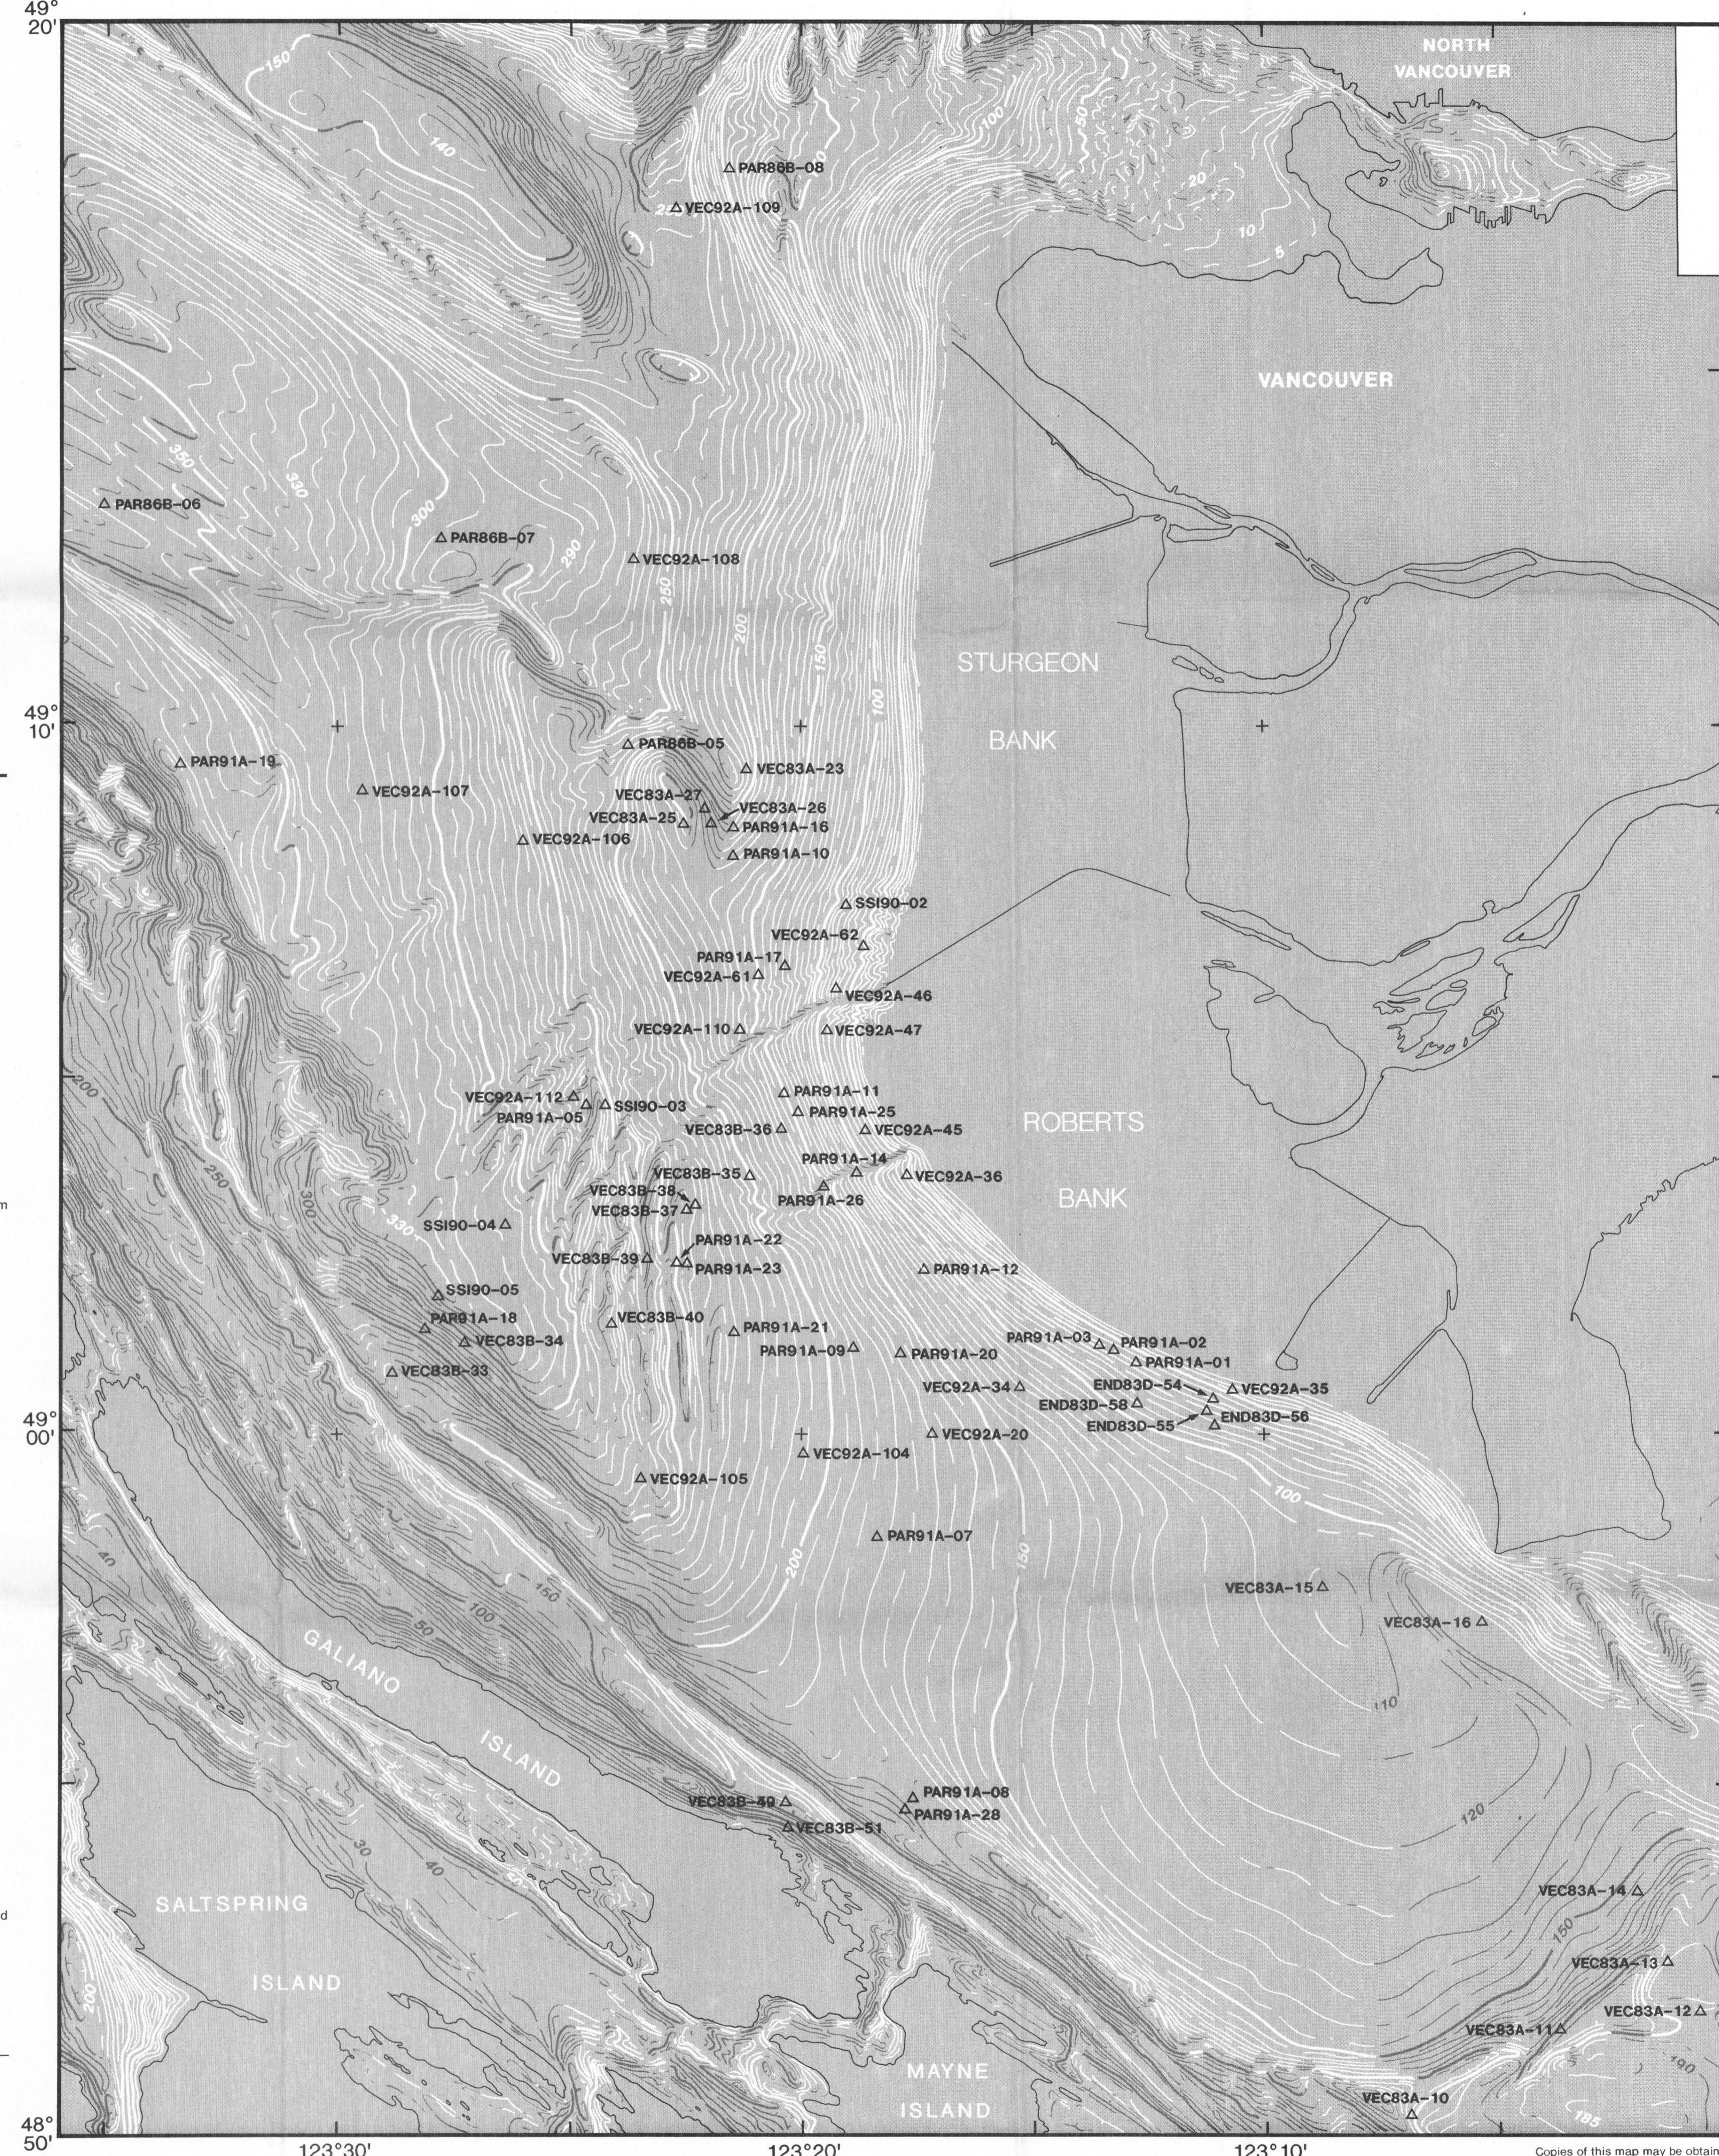

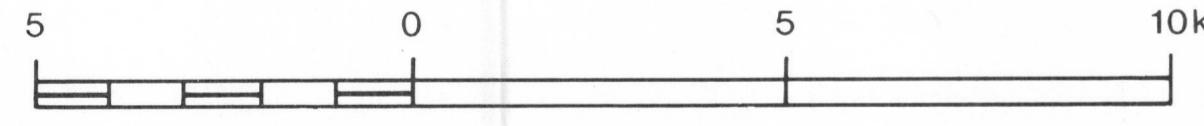

This map illustrates the location of gravity, piston, and vibrocores taken from the Strait of Georgia in proximity to the Fraser Delta during the course of cruises PGC-VEC-83-02 (14/2/83 - 17/2/83), PGC-VEC-83-03 (22/3/83-25/3/83), PGC-END-83-09 (5/12/83 - 8/12/83), PGC-PAR-86-08, (5/8/86 - 15/8/86), SSI McGaw 90 (survey aboard the McGaw) in conjunction with Sea Systems International, 16 & 17/10/90), PGC91-04 (13/5/91 - 24/5/91) and PGC92-01 (10/2/92 - 21/2/92). All of these cores are archived in the core storage facility of the Pacific Geoscience Centre. The following table lists the core type, length and work done on the cores as of June 1992.
