SHEET 2 OF 2
HYDROSWEEP BATHYMETRY OF AXIAL VOLCANO
JUAN DE FUCA RIDGE

Bathymetry collected by Freiberg University of Mining and Technology and GEOMAR (Forschungszentrum für Marine Geowissenschaften der Christian-Albrechts-Universität, Kiel) in cooperation with the Geological Survey of Canada and the National Oceanic and Atmospheric Administration, Cruise SO-109 of RV Sonne

Funding for the research cruise and collection of bathymetric data was provided by the German Federal Ministry for Research and Technology. This work was also supported by the Department of the Interior's Mineral Institute Program administered by the U.S. Bureau of Mines through the Marine Minerals Technology Center under grant number G1146108-9/11.

Digital cartography by D. Everett, Geoscience Information Division

Electrostatic plot produced by the Geoscience Information Division

Any revisions or additional information known to the user would be welcomed by the Geological Survey of Canada
