

**PROPORTIONAL PIE CHART
FOR NI, BA, CE, CR, LA and TA**

Pie chart integer values are assigned on the basis of percentile ranking of element data for individual sites (see text).

- >98th (Maximum Value) = 18
- >95th for all elements = 12
- >90th for all elements = 6
- Background Value = 0

N = 934

Scale 1:400 000 - Échelle 1/400 000

Kilometres

■ Nickel
■ Barium
■ Cerium
■ Chromium
■ Lanthanum
■ Tantalum

Fig. 22 Multi-element anomaly map for Ni, Ba, Ce, Cr, La and Ta in stream sediments to suggest possible areas for diamond prospecting, i.e. areas where kimberlite may exist.
