

**PROPORTIONAL PIE CHART  
FOR NI, BA, CE, CR, LA and TA**

Pie chart integer values are assigned on the basis of percentile ranking of element data for individual sites (see text).

Scale 1:400 000 - Échelle 1/400 000

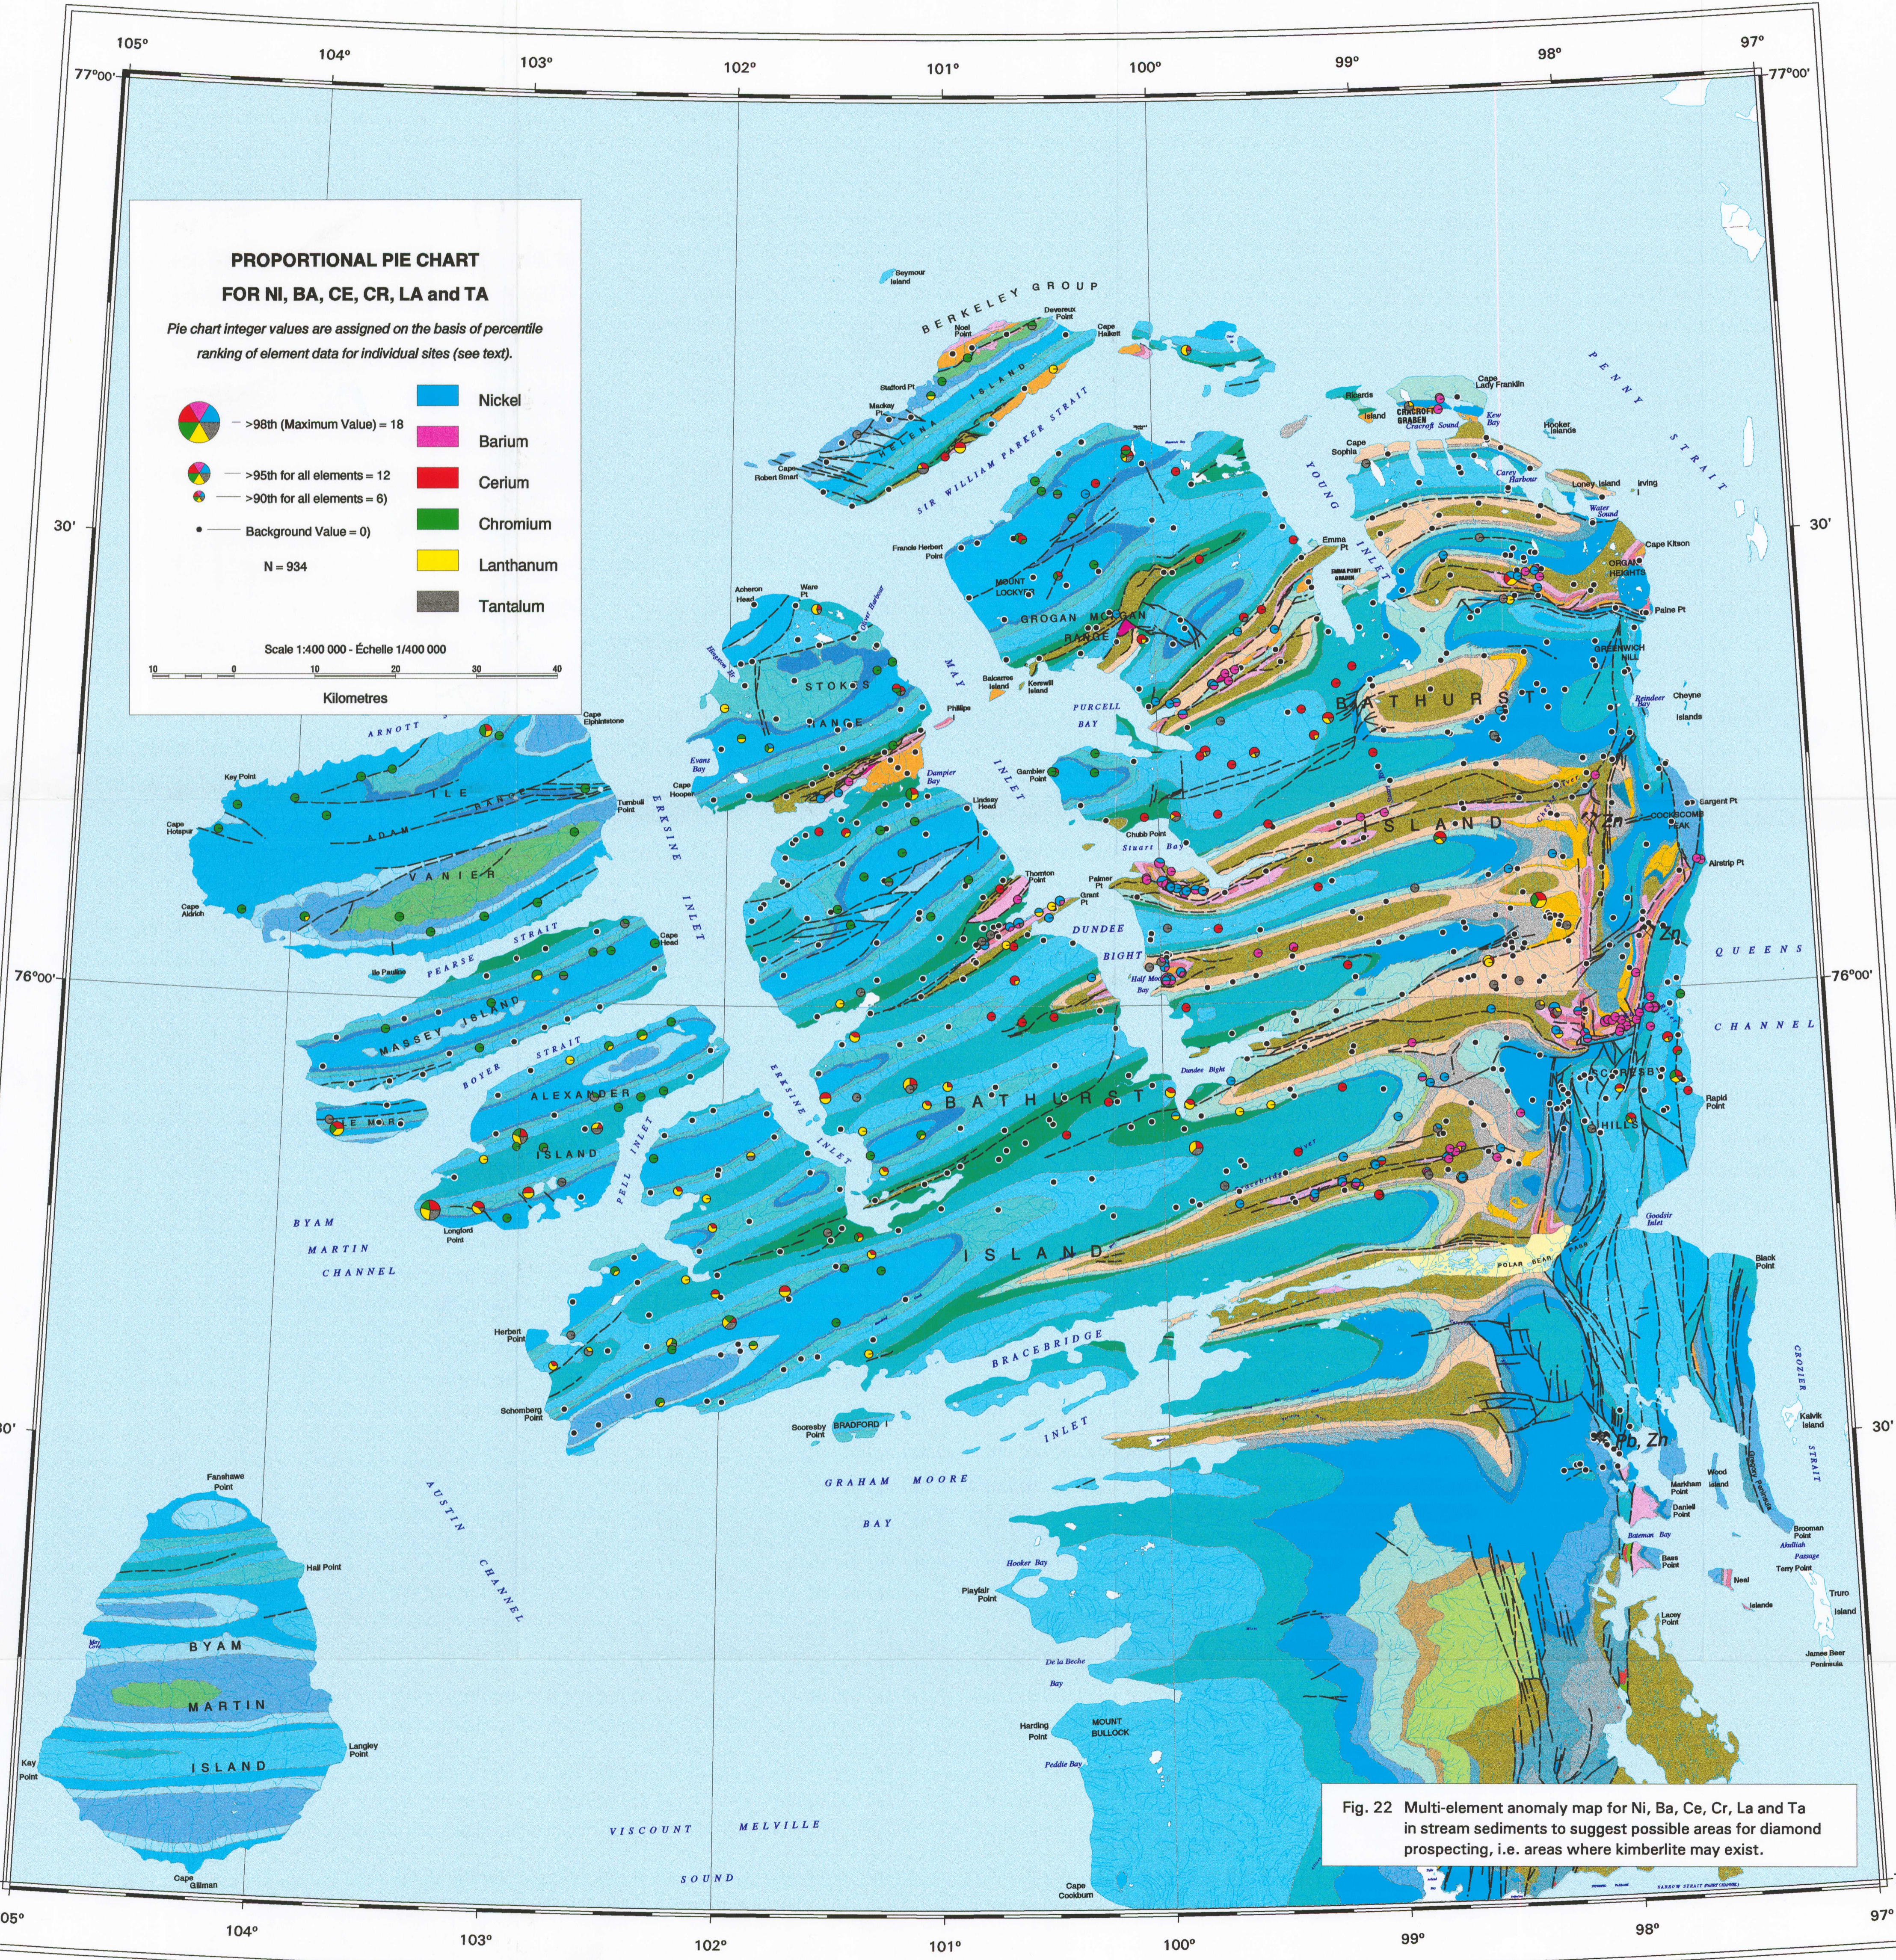

Fig. 22 Multi-element anomaly map for Ni, Ba, Ce, Cr, La and Ta in stream sediments to suggest possible areas for diamond prospecting, i.e. areas where kimberlite may exist.
